**Rene G. Rendon,Keith F. Snider,Ned Allen**

**Introduction to Defense Acquisition Management** ,2009 This ninth edition of Introduction to Defense Acquisition Management includes revisions to the regulatory framework for Defense systems acquisition management from the December 2008 Department of Defense Instruction 5000.02 and includes policy for determining requirements for defense systems from the Chairman of the Joint Chiefs of Staff 3170 series, Joint Capabilities Integration and Development System. This publication is designed to be both an introduction to the world of defense systems acquisition management for the newcomer and a summary-level refresher for the practitioner who has been away from the business for a few years. It focuses on Department of Defense-wide management policies and procedures, not on the details of any specific defense system.--Publisher's website.

*Defense Management* Thomas Galvin,Thomas P Galvin Editor,2018-10-11 Defense management is ultimately about making strategic decisions and rendering best military advice to the civilian leadership. The processes, systems, and massive amounts of data exist to help make the best decisions possible about the current preparedness and future requirements of the joint force. This Primer provides an introduction to the defense enterprise and the roles of senior leaders in it, especially for those who have limited experience in service, joint, or defense-level organizations.

**Defense Business Transformation: Achieving Success Requires a Chief Management Officer to Provide Focus and Sustained Leadership** ,2007 Although DOD has made progress toward establishing a management framework for overall business transformation, the framework currently focuses on business systems modernization and does not fully address broader business transformation efforts. In 2005, DOD set up the Defense Business Systems Management Committee to review and approve the business enterprise architecture a transformation blueprint and new business systems modernization investments. It also established the Business Transformation Agency, which currently reports to the Vice Chair of the Defense Business Systems Management Committee, to coordinate and lead business transformation across the department. Despite these steps, DOD has not clearly defined or institutionalized interrelationships, roles and responsibilities, or accountability for establishing a management framework for overall business

transformation. For example, differences of opinion exist within DOD about the roles of various senior leadership committees. Until DOD's business transformation management framework is institutionalized and encompasses broad responsibilities for all aspects of business transformation, it will be challenging for DOD to integrate related initiatives into a sustainable, enterprise-wide approach to successfully resolve weaknesses in business operations that GAO has shown are at high risk of waste, fraud, and abuse.

**Toward a Risk Management Defense Strategy [Enlarged Edition]** Nathan Freier, Strategic Studies Institute, 2014-02 This monograph offers key considerations for DoD as it works through the on-going defense review. The author outlines eight principles for a risk management defense strategy. He argues that these principles provide measures of merit for evaluating the new administration's defense choices. This monograph builds on two previous works—Known Unknowns: Unconventional Strategic Shocks in Defense Strategy Development and The New Balance: Limited Armed Stabilization and the Future of U.S. Landpower. Combined, these three works offer key insights on the most appropriate DoD responses to increasingly unconventional defense and national security conditions. This work in particular provides DoD leaders food for thought, as they balance mounting defense demands and declining defense resources.

*Introduction to Defense Acquisition Management* Charles B. Cochrane, Defense Acquisition University, Gary J. Hagan, 2005 This authoritative guide provides an update of the statutory and regulatory framework governing Defense systems acquisition as well as commentary on emerging trends and initiatives. It is designed to be both a comprehensive introduction to the world of systems acquisition management for the newcomer and a

refresher for the practitioner who has been away from the business a few years. It focuses on DOD-wide management policies and procedures.

**Defense Management Reform** Peter Levine,2020-03-10 Pentagon spending has been the target of decades of criticism and reform efforts. Billions of dollars are spent on weapons programs that are later abandoned. State-of-the-art data centers are underutilized and overstaffed. New business systems are built at great expense but fail to meet the needs of their users. Every Secretary of Defense for the last five Administrations has made it a priority to address perceived bloat and inefficiency by making management reform a major priority. The congressional defense committees have been just as active, enacting hundreds of legislative provisions. Yet few of these initiatives produce significant results, and the Pentagon appears to go on, as wasteful as ever. In this book, Peter Levine addresses why, despite a long history of attempted reform, the Pentagon continues to struggle to reduce waste and inefficiency. The heart of Defense Management Reform is three case studies covering civilian personnel, acquisitions, and financial management. Narrated with the insight of an insider, the result is a clear understanding of what went wrong in the past and a set of concrete guidelines to plot a better future.

National Defense Budgeting and Financial Management Philip J. Candreva,2017-05-01

The U.S. Department of Defense accounts for over half of federal government discretionary spending and over 3% of GDP. Half of all federal employees work for the Department. The annual budget for the military not only provides for those salaries, it covers the baseline and wartime operating expenses of the force, and hundreds of billions of dollars of investment in new capabilities and technologies. Given the materiality of the defense function and amount of resources it consumes, the processes for budgeting for defense and managing the funds is important to understand. This text provides a fully integrated view of defense budgeting. It takes the position that defense budgeting is a specific instance of public budgeting, and public budgeting is a specific instance of public policy. In order to fully understand how the nation budgets for defense, it first lays a theoretical and conceptual foundation for public policy and public budgeting. That is followed by an assessment of the political and policy context for defense, including the overarching federal budget process and role of Congress in setting defense policy. Only then does the text explore the specifics of defense budgeting: how, by whom, and why the budget is crafted. Beyond the topic of budgeting – formulating, requesting, and legitimating the request for funds – the book tackles financial management topics. Included are discussions of federal appropriations law, funds management, accounting requirements, intragovernmental business transactions, and contemporary topics of defense policy such as funding overseas contingency operations in an era of deficit control legislation. This book is an appropriate reference for both students and practitioners of defense budgeting and financial

management. It would also be appropriate in a general public budgeting course. Most public budgeting texts focus on state and municipal governments and there are few that address the federal system. This book fills that gap and provides a specific example of federal budgeting.
