Home Health Aide Training Manual and Handbook Emmanuel C. Anene,2009-03 It is my hope that this text, when properly used will be of great benefit to the individual aide or aide in training in mastering the required skills that would make the individual a good home health aide. The book has been specially tailored as a teaching tool for home health aides. The book has two sections, the tutorial section one and the practical hands on section two. The second section is a good aide or good training tool for practical demonstration purposes. For the purpose of understanding only, a home health aide does not have to be a Certified Nurses Aide. As a result this book can be used to train and prepare an individual to function in the capacity of a home health aide. The agency must prepare a set of standardized tests for the aides to ensure that the individual have fully internalized the reaching and training that they have been put through. This book further addresses the rule and regulation (federal and State) that the home health aide must be familiar with. This book is an excellent tool for the home health aide. I strongly encourage all individual who practice and plans to practice as an aide in the home health field to read this book.

The Caring Class Richard Schweid,2021-03-15 The number of elderly and disabled Americans in need of home health care is increasing annually, even as the pool of people—almost always women—willing to do this job gets smaller and smaller. The Caring Class takes readers inside the reality of home health care by following the lives of women training and working as home health aides in the South Bronx. Richard Schweid examines home health care in detail, focusing on the women who tend to our elderly and disabled loved ones and how we fail to value their work. They are paid minimum wage so that we might be absent, getting on with our own lives. The book calls for a rethinking of home health care and explains why changes are urgent: the current system offers neither a good way to live nor a good way to die. By improving the job of home health aide, Schweid shows, we can reduce income inequality and create a pool of qualified, competent home health care providers who would contribute to the well-being of us all. The Caring Class also serves as a guide into the world of our home health care system. Nearly 50 million US families look after an elderly or disabled loved one. This book explains the issues and choices they face. Schweid explores the narratives, histories, and people behind home health care in the United States, examining how we might improve the lives of both those who receive care and those who provide it.

Home Health Care Provider Emily Prieto, MBA, LSW,2008-06-09 This book is designed to foster quality care to home care recipients. Going beyond standard

nurses' aide training manuals, the book focuses on the psycho-social needs of home care recipients, stressing the need to maintain the house as a home and sustaining the recipient's way of life throughout caregiving situations. Prieto stresses interpersonal skills that benefit recipient and caregiver, creating a systematic, easy-to-follow plan for delivering quality service and maintaining, or improving, quality of life.
