2100 a Dystopian Utopia Vanessa Keith,2016-05-07

Urban Infrastructure Mikhail V Chester, PH D, Sybil Derrible, PH D, 2020-10-19 Infrastructure systems deliver basic and critical services. They are the pillars of civilization. In the twenty-first century, infrastructure will need to change to fit the needs of a new world. What shape will they take? What function will they provide? Who will they serve and why? In this book, forty experts from around the world share their reflections for infrastructure at 2100. The book is a series of science fiction short stories, essays, and poems. Climate change, sustainability, resilience, and technology are recurring themes in the reflections. Written in 2020, it is impossible to predict how infrastructure will be in 2100. The goal of this book is not to make accurate descriptions of the future. Instead, it is to provide a dialogue and visions of what we could hope for or fear. Only time will tell on which side of the balance we end up leaning.

2100 Jozef Van Keer, 2018-12-29 This is a story about life in the United States of America in the year 2100. Eighty percent of the population is being controlled by a corrupt government that dictates how people live their daily lives. The other 20 percent live in ghettos or hide underground in a thriving community where they still live a life based on the principles of our founding fathers. The government calls them the illegals, and it is constantly trying to capture them to reform them into what it deems normal citizens. The government has never been able to find the illegals' caves. A romance develops when one day, an IT programmer finds herself in a life-and-death situation and is rescued by an illegal. That is the start of a conspiracy by people on both sides to change life in the United States back to what it had been before.

Revolt in 2100 Robert Anson Heinlein, 1953

The Year 2100 Kyu Hwang, 2012-08 The book is a hybrid of fiction and projection, comprehensively including predictions on the future world. Fictional parts of the novel used to vividly portray fictitious figures carrying out national policy to impact on the world order. The prevalent land grab in the Third World now will develop into putting a whole nation on sale if a fortune will be offered to the citizens of target country. Thus, China will use its immense foreign currency reserve to annex a small country like Solomon Islands in the beginning stage, and then expand further into Eurasia. Likewise, other world powers will expand territories by the will of incorporated citizens. In result, political map of the world will differ much from current world. And rivalry in Asia will ignite spread of nuclear arsenals to satisfy their national pride but deep economic integration within the continent will set aside Cold War mentality for mutual prosperity. The gloomy prospect of food & energy will exacerbate the anxiety of contemporaries until awakened leading countries devoting to reverse the nightmare. After the mid-21st century, the haunting effects of climate change and peak oil will capitulate to the ingenuity and will of people, thereby next generation will access closely to a utopian world.

We Humans Overwhelm Our Earth: 11 or 2 Billion by 2100? Donald A. Collins, 2021-06-28 This book is a compilation of the best articles out of many published on the Church and State website from January 2013 by Collins about the total absence of global leadership to address uncontrolled human population growth which is destroying our Earth. Collins has a unique perspective of close to four generations of viewing our progress having travelled the world extensively and seeing the best of humanity in many forms. He knows that the most likely scenario for destruction of Earth and all species will result from human leaders' failure to understand and explain what needs to be done. He recommends, like many before him, that the United States should set an example by giving its people, and all of the people in the world, free contraceptives to empower women, raise billions out of poverty, and reduce our human population painlessly from its nearly 8 billion today to 2 billion by 2100.

VISIONS 2100 John K. O'Brien, 2015-11-02 Stories from Your Future The complex issue of climate change is one that our race is struggling to address. The solutions are not beyond us in any way. Technological solutions exist, scientific knowledge is plentiful, the world can afford the transition but still significant action eludes us. Rational arguments for rapid action abound. We do not need any more of those. What is needed is a different way of communicating that inspires and attracts the widest possible group of humans towards wanting to travel on this same journey. As part of the VISIONS 2100 Project, this book tells of the power of Visions and invites the reader to create and share their own vision of a better world. Only by starting conversations of the future will we manage to build the world that we really want. The book balances worries about catastrophe with social and environmental improvements by referencing psychology, management thought, case studies and personal anecdotes. In also references the parallels between the world's journey and coping with the chronic illness of the author's wife. The book is framed around eighty short visions by some of the world's leading environmental thinkers including Mary Robinson, Christiana Figueres, Bill McKibben, Connie Hedegaard, Yvo de Boer and many others. Having a vision of a better world is likely to result in the world being better. 'Poverty is eradicated. Every child goes to school regardless of sex, race, religion or place of birth. Every woman enjoys equality with every man. Every household has access to energy. In 2100, the world is just.' Mary Robinson, Special Envoy on Climate Change, United Nations 'Opportunity from 2100 forward is unimaginably vast and incredibly varied.' Christiana Figueres, Executive Secretary, UNFCCC 'Timing is everything, and it hurts to think we blew it.' Bill McKibben, 350.org The future is a beautiful, if challenging, partner. Your choice is whether you take the risk in having a first date or whether you are happy to accept a life of regret. www.visions2100.com

Ahkabal-na 2100. Segunda parte Pablo Hernández Encino, 2012-03 El caballero Shánhuinic es la serpiente que habla, sufre y casi muere. Si no hubiera pasado Nicolás por donde se encontraba muy mal herida, las esperanzas de enriquecer algunas personas ya se hubiera opacado, pero afortunadamente éste benefactor de algún afortunado aún vive. Si quieres poseer esa cajita repleta de tesoro, no le tengas miedo a esta serpiente cuando la veas atravesada en el camino. Pero tampoco trates de quitarle a mala porque te pesará. Nicolás va a viajar a Japón y a países europeos junto con Tatic Mamal y sus hijos.

Ahkabal-Ná 2100. Second Part Pablo Hernández Encino,2012-07-19 The cavalier Shanhuinic is a talking serpent. He has suffered and almost died. If Nicholas had not passed by where Shanhuinic was found badly injured, the hope of enriching some people would have been diminished. Fortunately, this patron of luck is still alive. If you wish to have the treasure chest, do not be afraid with the serpent when you see him across the road. However, it will cost you something if you try to take the treasure chest away from him. Nicholas will be traveling to Japan and European countries together with Tatic Mamal and his children.

Ahkabal-Ná 2100. Third Part Pablo Hernández Encino,2012-08-16 Finally, the cavalier Shanhuinic, the serpent, has been freed from the dangerous hand of the man. He put his life at risk for centuries. How many times has he escaped death, the slashing of machete and the hitting he received for trying to cross the roads in his serpent form, carrying at his back the heavy treasure chest. But thanks to Nicols, though with his dull mind, he was able to help and save the serpent from the final slashing of machete. More than a recognition, Shanhuinic considers it as a profound gratitude on his part. Tatic Mamal decided to offer the treasure box to Nicols. Hes worthy for this fortune because of his bravery and patience. It now depends on him if he will flourish his wealth or allow it to vanish. He also has the witchs rings. May everything go well.

The Escape from Hunger and Premature Death, 1700-2100 Robert William Fogel,2004-05-17 Nobel laureate Robert Fogel's compelling study, first published in 2004, examines health, nutrition and technology over the last three centuries and beyond. Throughout most of human history, chronic malnutrition has been the norm. During the past three centuries, however, a synergy between improvements in productive technology and in human physiology has enabled humans to more than double their average longevity and to increase their average body size by over 50 per cent. Larger, healthier humans have contributed to the acceleration of economic growth and technological change, resulting in reduced economic inequality, declining hours of work and a corresponding increase in leisure time. Increased longevity has also brought increased demand for health care. Professor Fogel argues that health care should be viewed as the growth industry of the twenty-first century and systems of financing it should be reformed. His book will be essential reading for all those interested in economics, demography, history and health care policy.
