The Ships of Christopher Columbus Xavier Pastor, 2005 1992 marked the 500th anniversary of the European discovery of the Americas by Christopher Columbus. The details of Columbus's ships - the Santa Maria, Nina and Pinta - remain lost to historians, for the ships were built before the first manuals of shipbuilding were written, and no documentation or illustration has survived.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Infinity Net: The Autobiography of Yayoi Kusama Yayoi Kusama, 2021-09-01 I am deeply terrified by the obsessions crawling over my body, whether they come from within me or from outside. I fluctuate between feelings of reality and unreality. I, myself, delight in my obsessions.' Yayoi Kusama is one of the most significant contemporary artists at work today. This engaging autobiography tells the story of her life and extraordinary career in her own words, revealing her as a fascinating figure and maverick artist who channels her obsessive neuroses into an art that transcends cultural barriers. Kusama describes the decade she spent in New York, first as a poverty stricken artist and later as the doyenne of an alternative counter-cultural scene. She provides a frank and touching account of her relationships with key art-world figures, including Georgia O'Keeffe, Donald Judd and the reclusive Joseph Cornell, with whom Kusama forged a close bond. In candid terms she describes her childhood and the first appearance of the obsessive visions that have haunted her throughout her life. Returning to Japan in the early 1970s, Kusama checked herself into a psychiatric hospital in Tokyo where she resides to the present day, emerging to dedicate herself with seemingly endless vigour to her art and her writing. This remarkable autobiography provides a powerful insight into a unique artistic mind, haunted by fears and phobias yet determined to maintain her position at the forefront of the artistic avant-garde. In addition to her artwork, Yayoi Kusama is the author of numerous volumes of poetry and fiction, including *The Hustler's Grotto of Christopher Street*, *Manhattan Suicide Addict* and *Violet Obsession*.

The Da Vinci Globe Stefaan Missinne, 2019-01-17 A chance discovery at a distinguished London map fair in 2012 by a Belgian globe collector produced the most unique of finds: a distinct globe with mysterious images, such as old ships, sailors, a volcano, a hybrid monster, pentimenti, waving patterns, conic individualised mountains, curving rivers, vigorous coastal lines, chiaroscuro and an unresolved triangular anagram, which remains an enigma. The globe is hand-engraved in great detail on ostrich egg shells from Pavia by a left-handed Renaissance genius of unquestionable quality. It shows secret knowledge of the map world from the time of Columbus, Cabral, Amerigo Vespucci and Leonardo da Vinci. Central and North America are covered by a vast ocean. The da Vinci globe originates from Florence and dates from 1504. It marks the first time ever that the names of countries such as Brazil, Germania, Arabia and Judea have appeared on a globe. A Leonardo drawing for this globe, showing the coast of the New World and Africa has been discovered in the British Library. This book brings the reader through a fabulous journey of scholars, maps, riddles, rebuses, iconographic symbols and enigmatic phrases such as HIC SVNT DRACONES to illuminate the da Vinci globe. It details 500 years of mystery, fine scholarship and expert forensic testing at numerous material science laboratories the world over. The da Vinci globe now takes its rightful place, surpassing the Lenox globe, its copper-cast identical twin, as the most mysterious globe of our time. As such, this monograph is an essential text in Leonardo studies and in the history of cartography.

The Naming of America Martin Waldseem  ller, 2008 This new book features a facsimile of the 1507 World Map by Martin Waldseem  ller - the first map ever to display the name America - and tells the fascinating story behind its creation in 16th-century France and rediscovery 300 years later in the library of Wolfegg Castle, Germany, in 1901. It also includes a completely new translation and commentary to Martin Waldseem  ller and Matthias Ringmann's seminal cartographic text, the *Cosmographiae Introductio*, which originally accompanied the World Map. John Hessler considers answers to some of the key questions raised by the map's representation of the New World, including 'How was it possible for a small group of cartographers to have produced a view of the world so radical for its time and so close to the one we recognize today?'; and 'What evidence did they possess to show the existence of the Pacific Ocean when neither Vasco Nunez de Balboa nor Ferdinand Magellan had yet reached it'. There are no easy answers, and yet, as this fascinating book reveals, this group of unknowns created some of the most important maps in the history of cartography, and afford us a glimpse into an age when accepted scientific and geographic principles fell away, spawning the birth of modernity.

The Marriage of Heaven and Earth Marlin Watling, 2016-10-07 On the lookout for a mind-blowing new perspective on the nature of God and humanity's place in the world today? Dive into *The Marriage of Heaven and Earth*, and enter the mind of a veritable rock star of contemporary theology-N. T. Wright. Marlin Watling takes abstract and complex ideas and grounds them in simple terms through his unique combination of readable summaries and fifty accompanying illustrations. He distills a lifetime of complex theological analysis and data into easy-to-consume sketches with explanations to provide one thing: universal access to a brilliant mind. Watling's guide comprises four parts ♦ An introduction to N. T. Wright ♦ Summaries of Wright's four key concepts ♦ Wright's proposal of a new worldview ♦ An overview of humanity's mission, with an eye toward the end times Following in the footsteps of reformer Martin Luther, N. T. Wright makes the old story new again with his paradigm-shifting worldview. And in *The Marriage of Heaven and Earth*, Watling does something equally novel.
