Shantyboat Harlan Hubbard,1977-01-01 Shantyboat is the story of a leisurely journey down the Ohio and Mississippi rivers to New Orleans. For most people such a journey is the stuff that dreams are made of, but for Harlan and Anna Hubbard, it became a cherished reality. In their small river craft, the Hubbards became one with the flowing river and its changing weathers. This book mirrors a life that is simple and independent, strenuous at times, but joyous, with leisure for painting and music, for observation and contemplation.

*How to Build a Wooden Boat* David C. McIntosh,1988-03 David C. Bud McIntosh was a designer, builder, and sailor of large and small wooden cruising boats for more than 50 years, and wrote about it for over 10 of those years. He made his home on New Hampshire's Piscataqua River, where he was teacher and friend to both amateur and professional boatbuilders.

*Building Catherine* Richard Kolin,2001 Richard Kolin has been building boats for 25 years. He has designed and built skiffs for both plywood and plank construction.

*Structural Adjustment and Regulation of Nordic Fisheries until 2025* Max Nielsen,Ayoe Hoff,Rasmus Nielsen,Peder Andersen,2018-10-04 Fishery policies are broadly debated in the Nordic countries, focusing on balancing biological concern of fish stocks, economic return to society and coastal communities' interests. Market Based Fisheries Management is used in several Nordic countries today and is the core of these debates. While it by many is considered a powerful tool that works towards ensuring improved economy of fisheries, it is also considered a controversial tool. This report "Structural Adjustment and Regulation of Nordic Fisheries until 2025" document the effects of Market Based Management of selected Nordic fisheries, forecast the structural development of these until 2025 under the current alternative fishery management. Nordic lessons on Market Based

Fisheries Management are also provided as a basis for the political debate on the future of Nordic Fisheries.

**The Dory Book** John Gardner, 2022-06-15 The dory has seen duty as a fishing boat, lumberman's batteau, lifeboat, recreational rowing boat, and racing sailboat. The most comprehensive book about dories ever published, this is at once a history of the dory, a practical handbook on dory building, and a compendium of 23 dory designs with full construction details. The author, a longtime contributor to *National Fisherman*, and the illustrator, Sam Manning, are perhaps the foremost experts on the subject. A steady stream of letters and photographs to the late John Gardner from successful dory builders worldwide has been testimony to the widespread popularity and influence of this book.

**Marine Anthropogenic Litter** Melanie Bergmann, Lars Gutow, Michael Klages, 2015-06-01 This book describes how man-made litter, primarily plastic, has spread into the remotest parts of the oceans and covers all aspects of this pollution problem from the impacts on wildlife and human health to socio-economic and political issues. Marine litter is a prime threat to marine wildlife, habitats and food webs worldwide. The book illustrates how advanced technologies from deep-sea research, microbiology and mathematic modelling as well as classic beach litter counts by volunteers contributed to the broad awareness of marine litter as a problem of global significance. The authors summarise more than five decades of marine litter research, which receives growing attention after the recent discovery of great oceanic garbage patches and the ubiquity of microscopic plastic particles in marine organisms and habitats. In 16 chapters, authors from all over the world have created a universal view on the diverse field of marine litter pollution, the biological impacts, dedicated research activities, and the various national and international legislative efforts to combat this environmental problem. They recommend future research directions necessary for a comprehensive understanding of this environmental issue and the development of

efficient management strategies. This book addresses scientists, and it provides a solid knowledge base for policy makers, NGOs, and the broader public.

The Cambridge History of Scandinavia Knut Helle, 2003-09-04

This volume presents a comprehensive exposition of both the prehistory and medieval history of the whole of Scandinavia. The first part of the volume surveys the prehistoric and historic Scandinavian landscape and its natural resources, and tells how man took possession of this landscape, adapting culturally to changing natural conditions and developing various types of community throughout the Stone, Bronze and Iron Ages. The rest - and most substantial part of the volume - deals with the history of Scandinavia from the Viking Age to the end of the Scandinavian Middle Ages (c. 1520). The external Viking expansion opened Scandinavia to European influence to a hitherto unknown degree. A Christian church organisation was established, the first towns came into being, and the unification of the three medieval kingdoms of Scandinavia began, coinciding with the formation of the unique Icelandic 'Free State'.

*Vulnerable marine ecosystems (VMEs): Coral and sponge VMEs in Arctic and sub-Arctic waters - Distribution and threats* Buhl-Mortensen, Lene, Burgos, Julian Mariano, Steingrund, Petur, Buhl-Mortensen, Pål, Ólafsdóttir, Steinunn H, Ragnarsson, Stefán Á, 2019-04-17 This report presents results from the NovasArc project that has collated data on the distribution of vulnerable marine ecosystems (VMEs) in Arctic and sub-Arctic waters. Eleven VMEs were identified, based on management goals for coral and sponge communities. Many of the vulnerable marine ecosystems (VMEs) in the study area has a wide distribution. Soft and hard bottom sponge aggregations, hard bottom gorgonians, sublittoral sea pen communities, and cauliflower corals are predicted to cover > 20% of the study area shallower than 1000 meters. Of the anthropogenic activities in the study area bottom trawling represents the main threat to the VMEs. The compilation of

trawling activity in the study area shows that fisheries mainly occurs shallower than 1000 meters and that 50 to 60% of the seafloor is not targeted. However, 30% of the seafloor has experienced intermediate to very high fishing effort. In general, the VMEs shows a larger overlap with fishing when the risk analysis is based on areas with an optimal habitat suitability. Using this conservative threshold to model the distribution of VMEs the results indicate that most VMEs have experienced an intermediate to high level of fishing in less than 40% of their distribution area in the whole study area.

*Climate Impacts on the Baltic Sea: From Science to Policy* Marcus Reckermann,2014-05-09 The Baltic Sea area is an old cultural landscape with a well developed international framework for monitoring, assessing and managing its marine ecosystems. It provides a good case study for other regions where such management is being set up. The chapters in this book are based on lectures given at a summer school on the Baltic Sea island of Bornholm in the summer of 2009. They cover a range of topics, spanning from detailed descriptions of political agreements that protect the marine environment, to basic modelling instructions, to an assessment of the possible impacts of climate change on the

marine ecosystem, to a reflection on the role of climate scientists and their responsibility in society. This interdisciplinary book is primarily directed at students and lecturers of the environmental disciplines to provide an overview of the possible impacts of climate change on the Baltic Sea. It is also intended to serve as a background reference for scientists and policy makers, both for the Baltic Sea area and more generally. The book is a contribution to the BALTTEX programme and to the BONUS+ projects ECOSUPPORT and Baltic-C.

The Compleat Cruiser L. Francis Herreshoff, 1991 Famed yacht designer and author L. Francis Herreshoff takes us on family style cruises in American waters, during which all sorts of boats and boating skills are explained while they are used. He tells about the adventures of the crews of the catboat Piscator, the ketch Viator, and the engineless whaleboat-style ketch Rozinante. There are anecdotes and examples and a wide variety of boat lore in each chapter, as well as adventures, races and coastwide cruises and historical harbors to visit.

Globalizing Torture ,2013 Following the terrorist attacks of September 11, 2001, the Central Intelligence Agency embarked on a highly classified program of secret detention and extraordinary rendition of terrorist suspects. The program was designed to place detainee interrogations beyond the reach of law. Suspected terrorists were seized and secretly flown across national borders to be interrogated by foreign governments that used torture, or by the CIA itself in clandestine 'black sites' using torture techniques. This report is the most comprehensive account yet assembled of the human rights abuses associated with secret detention and extraordinary rendition operations. It details for the first time the number of known victims, and lists the foreign governments that participated in these operations. It shows that responsibility for the abuses lies not only with the United States but with dozens of foreign governments that were complicit. More than 10 years after the 2001 attacks, this report makes it unequivocally clear that the

time has come for the United States and its partners to definitively repudiate these illegal practices and secure accountability for the associated human rights abuses.

**Referendums and Ethnic Conflict** Matt

Qvortrup,2022-04-05 Although referendums have been used for centuries to settle ethnonational conflicts, there had yet been no systematic study or generalized theory concerning their effectiveness until Matt Qvortrup's *Referendums and Ethnic Conflict*. Qvortrup's study filled the gap with a comparative and empirical analysis of all the referendums held on ethnic and national issues from the French Revolution to the 2012 referendum on statehood for Puerto Rico. Drawing on political theory and descriptive case studies, the scholar created typologies of referendums that are held to endorse secession, redraw disputed borders, legitimize a policy of homogenization, or otherwise manage ethnic or national differences. He considered the circumstances that compel politicians to resort to direct democracy, such as regime change, and the conditions that might exacerbate a violent response. Qvortrup offers a clear-eyed assessment of the problems raised when conflict resolution is sought through referendum as well as the conditions that are likely to lead to peaceful outcomes. This updated and revised edition includes a new introduction bringing the general field to the present, as well as new specific sections on Scotland (2014), Catalonia (2017), and the Brexit vote in the United Kingdom (2016). The original work's political framework now also covers the literature on identity politics, online campaigning, the regulation of social media, and how referendums are used increasingly as populist devices. This edition also updates referendum results through the end of 2020.
