Alien RPG Free League Publishing, 2019-12-10 Space is vast, dark, and not your friend. Gamma rays and neutrino bursts erupt from dying stars to cook you alive, black holes tear you apart, and the void itself boils your blood and seizes your brain. Try to scream and no one can hear you - hold your breath and you rupture your lungs. Space isn't as empty as you'd think, either - its frontiers are ever expanding. Rival governments wage a cold war of aggression while greedy corporations vie for valuable resources. Colonists reach for the stars and gamble with their lives - each new world tamed is either feast or famine. And there are things lurking in the shadows of every asteroid - things strange and different and deadly. Things alien. This is the official ALIEN tabletop roleplaying game - a universe of body horror and corporate brinkmanship, where synthetic people play god while space truckers and marines serve host to newborn ghoulish creatures. It's a harsh and unforgiving universe and you are nothing if not expendable. Stay alive if you can--Back cover.

Hardware: The Definitive SF Works of Chris Foss Chris Foss, 2011-09-06 Foss's groundbreaking and distinctive science fiction art revolutionized paperback covers in the 1970s and 80s. Dramatically raising the bar for realism and invention, his trademark battle-weary spacecraft, dramatic alien landscapes and crumbling brutalist architecture irrevocably changed the aesthetic of science fiction art and cinema. Featuring work for books by Isaac Asimov, E. E. 'Doc' Smith, Arthur C. Clarke, A. E. Van Vogt and Philip K. Dick, and film design for Ridley Scott and Stanley Kubrick, this volume brings together many rare and classic images that have never been seen or reprinted before. The first comprehensive retrospective of Chris Foss's SF career. "Chris Foss' name has become pre-eminent among sf artists... He is in love with the monstrous, with angular momentum, with inertia-free projectiles and irresistible objects." - Brian Aldiss "[Foss'] creations are real machines, not just an artist's dreams. They combine the two elements so essential to science fiction: realism and a sense of wonder... A medieval goldsmith of future eons." - Alejandro Jodorowsky

2 Billion Under 20 Jared Kleinert, Stacey Ferreira, 2015-07-28 Of the roughly 6.97 billion people on Earth today, approximately 2 billion of them are under 20 years old. Millennials have a lot of reputations these days, but powerful, smart, and affective are not usually the adjectives used to describe them. Jared Kleinert and Stacey Ferreira want to change that and empower these young people to follow their dreams, set goals, and achieve success. Both young successful entrepreneurs themselves, they believe in breaking down age barriers to make a difference. Jared, best-known as the Founder and CEO of Synergist, and Stacey, best-known as the Co-Founder of MySocialCloud.com met in 2012 at the Under 20 Thiel Fellowship Summit. After speaking with their equally impressive peers, they realized that these 2 billion young voices have inspiring stories to share with the world and they wanted to bring them to life through 2 Billion Under 20. Jared and Stacey also decided to start an online community, www.2BillionUnder20.com where young people could help each other grow and develop their dreams into reality. They've curated an anthology of amazing stories from their peers. Contributors like Paige McKenzie who started her own YouTube channel at the age of 16 that now has more than 55 million views and Jack Andraka who created an early detection Pancreatic cancer test at age 14 have joined forces to show the world that age is just a number.

Digital Design of Nature Oliver Deussen, Bernd Lintermann, 2006-03-30 What is computer graphics and what are the conceptual tasks of research in this area? To the average person the term still conveys more or less the design of - gos and the manipulation of pictures with the help of image-editing programs. However, during the past four decades, computer graphics has evolved into an innovative multifaceted field of research and computing that affects many

other sciences. In many areas and for many problems we can best convey an understanding through images that trigger our sense with the highest capability: our eye. And, what is more, aside from algorithms, formulas, and tables, the computer graphics scientist often is able to create beauty. Though it is a beauty of its own, it often fascinates the viewer, especially when complex aesthetic images emerge from simple mathematical concepts. Also, there are only a few other areas that advance as dynamically as inf-matics and especially computer graphics. While CPU capacity still increases and is almost doubled every 18 months, the rendering speed and efficiency of graphics boards has increased even more during recent years. Today, images can be rendered in real time that some years ago still required several hours of computing. Parallel to the rapid improvement of computer hardware, many new algorithms were developed that today form the basis for some fundamental changes and achievements in graphics.
