**Santa!** Rufus Butler Seder, 2013-09-24 Santa Claus is going to town! Marrying the magic of Scanimation with the universally beloved figure of Santa Claus, Santa! is a holiday book unlike any other. It presents a Santa that readers have never seen before—acrobatic, playful, a little mischievous, filled with joyful energy. Here's Santa hula-hooping. Santa juggling. Santa doing cartwheels and Santa on a unicycle. Children, as they did with Gallop!, will want to imitate Santa's irresistibly happy motions. The grown-ups will be unable to stop smiling—it's hard to imagine a cooler character than this jolly St. Nick as he runs, spins, gyrates, backflips, and blows big bubbles. Scanimation is the technology behind the instant New York Times best-selling series that started with Gallop!, to most recently The Wizard of Oz. Author and inventor Rufus Butler Seder continues to refine the Scanimations, with ever more smooth-flowing and detailed moving images—perfectly applied, in this case, to the irresistible figure of Santa Claus.

We Are Data John Cheney-Lippold,2017-05-02 What identity means in an algorithmic age: how it works, how our lives are controlled by it, and how we can resist it Algorithms are everywhere, organizing the near limitless data that exists in our world. Derived from our every search, like, click, and purchase, algorithms determine the news we get, the ads we see, the information accessible to us and even who our friends are. These complex

configurations not only form knowledge and social relationships in the digital and physical world, but also determine who we are and who we can be, both on and offline. Algorithms create and recreate us, using our data to assign and reassign our gender, race, sexuality, and citizenship status. They can recognize us as celebrities or mark us as terrorists. In this era of ubiquitous surveillance, contemporary data collection entails more than gathering information about us. Entities like Google, Facebook, and the NSA also decide what that information means, constructing our worlds and the identities we inhabit in the process. We have little control over who we algorithmically are. Our identities are made useful not for us—but for someone else. Through a series of entertaining and engaging examples, John Cheney-Lippold draws on the social constructions of identity to advance a new understanding of our algorithmic identities. *We Are Data* will educate and inspire readers who want to wrest back some freedom in our increasingly surveilled and algorithmically-constructed world.

*About Christmas* Nicolae Sfetcu, 2014-05-01 Christmas characters and food, Christmas-linked holidays and music, Santa Claus and traditions. Related to Annunciation, Incarnation; Crucifixion; Advent, the four weeks preceding Christmas; and the period between the day after Thanksgiving and the Sunday after New Year's Day, the American holiday season. Christmas or Christmas Day is a holiday celebrating the birth of Jesus, the central figure of Christianity. Aspects of celebration may include gift-giving, Christmas trees, display of Nativity sets, church attendance, the Father Christmas/Santa Claus myth, and family gatherings. Users of the Gregorian calendar observe the holiday on December 25. Some Eastern Orthodox Churches celebrate on December 25 by the Julian calendar, which currently corresponds to January 7 on the Gregorian calendar. These dates are merely traditional; the great majority of scholars agree that the actual birthdate of Jesus is unknown. In Western culture, the holiday is characterized by the exchange of gifts among friends and family members, some of the gifts being attributed to Santa Claus (also known as Father Christmas, Saint Nicholas, Saint Basil and Father Frost). However, various local and regional Christmas traditions are still practiced, despite the widespread influence of American, British and Australian Christmas motifs disseminated by film, popular literature, television, and other media.
