What Video Games Have to Teach Us About Learning and Literacy. Second Edition James Paul

Gee,2014-12-02 James Paul Gee begins his classic book with I want to talk about video games--yes, even violent video games--and say some positive things about them. With this simple but explosive statement, one of America's most well-respected educators looks seriously at the good that can come from playing video games. In this revised edition of *What Video Games Have to Teach Us About Learning and Literacy*, new games like *World of Warcraft* and *Half Life 2* are evaluated and theories of cognitive development are expanded. Gee looks at major cognitive activities including how individuals develop a sense of identity, how we grasp meaning, how we evaluate and follow a command, pick a role model, and perceive the world.

The Pea and the Sun Leonard M. Wapner,2005-04-29 Take an apple and cut it into five pieces. Would you believe that these five pieces can be reassembled in such a fashion so as to create two apples equal in shape and size to the original? Would you believe that you could make something as large as the sun by breaking a pea into a finite number of pieces and putting it back together again? Neither did Leonard Wapner, author of *The Pea and the Sun*, when he was first introduced to the Banach-Tarski paradox, which asserts exactly such a notion. Written in an engaging style, *The Pea and the Sun* catalogues the people, events, and mathematics that contributed to the discovery of Banach and Tarski's magical paradox. Wapner makes

one of the most interesting problems of advanced mathematics accessible to the non-mathematician.

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL,

in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

JR: Can Art Change the World? Nato

Thompson, Joseph Remnant, Marc Azoulay, 2015-10-12

The first major and in-depth retrospective monograph on JR, the enigmatic and anonymous Parisian photographer/street artist/activist behind some of the world's most provocative large-scale public photography projects. Created in close collaboration with JR, this book includes all bodies of his work, his collaborations with other artists and institutions such as the New York Ballet and previously unpublished behind-the-scenes documentation of his studios in Paris and New York, where he and his creative collaborators live and work. Introducing JR 's story is a specially commissioned graphic novel by comic artist Joseph Remnant, which charts his rise from graffiti roots and his decision to become a full-time artist. Features a survey essay by Nato Thompson, Chief Curator of Creative Time, New York.

Making up Numbers: A History of Invention in

Mathematics Ekkehard Kopp, 2020-10-23

Making up Numbers: A History of Invention in Mathematics offers a detailed but accessible account of a wide range of mathematical ideas. Starting with elementary concepts, it leads the reader towards aspects of current mathematical research. The book explains how conceptual hurdles in the development

of numbers and number systems were overcome in the course of history, from Babylon to Classical Greece, from the Middle Ages to the Renaissance, and so to the nineteenth and twentieth centuries. The narrative moves from the Pythagorean insistence on positive multiples to the gradual acceptance of negative numbers, irrationals and complex numbers as essential tools in quantitative analysis. Within this chronological framework, chapters are organised thematically, covering a variety of topics and contexts: writing and solving equations, geometric construction, coordinates and complex numbers, perceptions of 'infinity' and its permissible uses in mathematics, number systems, and evolving views of the role of axioms. Through this approach, the author demonstrates that changes in our understanding of numbers have often relied on the breaking of long-held conventions to make way for new inventions at once providing greater clarity and widening mathematical horizons. Viewed from this historical perspective, mathematical abstraction emerges as neither mysterious nor immutable, but as a contingent, developing human activity. Making up Numbers will be of great interest to undergraduate and A-level students of mathematics, as well as secondary school teachers of the subject. In virtue of its detailed treatment of mathematical ideas, it will be of value to anyone seeking to learn more about the development of the subject.

Good Faith Collaboration Joseph M. Reagle, Jr., 2012-09-21 How Wikipedia collaboration addresses the challenges of openness, consensus,

and leadership in a historical pursuit for a universal encyclopedia. Wikipedia, the online encyclopedia, is built by a community—a community of Wikipedians who are expected to “assume good faith” when interacting with one another. In *Good Faith Collaboration*, Joseph Reagle examines this unique collaborative culture. Wikipedia, says Reagle, is not the first effort to create a freely shared, universal encyclopedia; its early twentieth-century ancestors include Paul Otlet's *Universal Repository* and H. G. Wells's proposal for a *World Brain*. Both these projects, like Wikipedia, were fuelled by new technology—which at the time included index cards and microfilm. What distinguishes Wikipedia from these and other more recent ventures is Wikipedia's good-faith collaborative culture, as seen not only in the writing and editing of articles but also in their discussion pages and edit histories. Keeping an open perspective on both knowledge claims and other contributors, Reagle argues, creates an extraordinary collaborative potential. Wikipedia's style of collaborative production has been imitated, analyzed, and satirized. Despite the social unease over its implications for individual autonomy, institutional authority, and the character (and quality) of cultural products, Wikipedia's good-faith collaborative culture has brought us closer than ever to a realization of the century-old pursuit of a universal encyclopedia.

The Madeleine Project Clara Beaudoux, 2017 A young woman moves into a Paris apartment and discovers a storage room filled with the

belongings of the previous owner, a certain Madeleine who died in her late nineties, and whose treasured possessions nobody seems to want. In an audacious act of journalism driven by personal curiosity and humane tenderness, Clara Beaudoux embarks on The Madeleine Project, documenting what she finds on Twitter with text and photographs, introducing the world to an unsung 20th century figure. Along the way, she discovers a Parisian life indelibly marked by European history. This is a graphic novel for the Twitter age, a true story that encapsulates one woman's attempt to live a life of love and meaning together with a contemporary quest to prevent that existence from slipping into oblivion. The Madeleine Project movingly chronicles, and allows us to reconstruct, intimate memories of a bygone era.

The Roots of Capitalism John Chamberlain, 1976
Capitalism is a system that can stand on its own attainments, says John Chamberlain, and he offers

here a fast-paced, provocative look at the intellectual forces and practical accomplishments that have created American capitalism. In clear, unequivocal language he discusses the ideas responsible for our economic institutions, the originators of these ideas, and the times in which they first became important. The political theories of the men who hammered out the Magna Carta and the Declaration of Independence; the thinking of John Locke, James Madison, and Adam Smith; the deeds and discoveries of the James Watts, Eli Whitneys, and Henry Fords--all these diverse elements are shown to be part of the tradition of a free society in which American capitalism has grown and flourished. A unique blend of political and economic theory and the practical accomplishments of businessmen and innovators, *The Roots of Capitalism* provides valuable insights into the ideas underlying the free economy. John Chamberlain is an editor and journalist.

Infinity and the Mind Rudy Rucker, 2019-07-23 A dynamic exploration of infinity In *Infinity and the Mind*, Rudy Rucker leads an excursion to that stretch of the universe he calls the "Mindscape," where he explores infinity in all its forms: potential and actual, mathematical and physical, theological and mundane. Using cartoons, puzzles, and quotations to enliven his text, Rucker acquaints us with staggeringly advanced levels of infinity, delves into the depths beneath daily awareness, and explains Kurt Gödel's belief in the possibility of robot consciousness. In the realm of infinity, mathematics, science, and logic merge

with the fantastic. By closely examining the paradoxes that arise, we gain profound insights into the human mind, its powers, and its limitations. This Princeton Science Library edition includes a new preface by the author.

The Spider's House Paul Bowles, 2011-11-15
Originally published in 1955, Paul Bowles's remarkable novel set in Fez, Morocco, during the last days of the French colonial empire, is an expansive piece of writing—vintage Bowles With its atmosphere of sinister tension, its scenes of nationalist conspiracy and French police action, of escape and pursuit in the Arab quarter, *The Spider's House* reads for stretches like a first-class political thriller. -New York Times The dilemma of the outsider in an alien society, and the gap in understanding between cultures, recurrent themes of Paul Bowles's writings, are dramatized with brutal honesty in this novel set in Fez, Morocco, during that country's 1954 nationalist uprising. Totally relevant to today's political situation in the Middle East and elsewhere, richly descriptive of its setting, and uncompromising in its characterizations, *The Spider's House* is perhaps Bowles's best, most beautifully subtle novel.

Dieter Rams Sophie Lovell, 2024-09-05 The definitive monograph on Dieter Rams, one of the most influential product designers of the twentieth century As head of design at Braun from 1961 to 1995, Dieter Rams created some of the twentieth century's most iconic objects. Rams's life and work are indelibly linked to his thoughts about how people live, and how they can live

better. Products he designed in the 1960s are still produced and sold today, and his ideas on good design continue to inspire designers and consumers. Now available again with a stunning new cover, this comprehensive monograph, with a foreword by Jonathan (Jony) Ive, former chief design officer of Apple, explores not only Rams's life and work, but also his design philosophy. The book includes detailed text covering Rams's life, the intellectual context in which he worked, his designs for Braun and Vitsoe, and the ideas and lectures he developed as an advocate for good design. Sketches and photographs of finished products and prototypes provide insight into Rams's design process, diverse archival material gives a complete picture of his life and work, and specially commissioned photographs of Dieter Rams's house and the Braun archive provide an exclusive glimpse of the world's most complete collection of Rams's designs. Known for the hundreds of iconic products he designed for Braun and Vitsoe, this comprehensive and exhaustive monograph also features Rams's only architectural work and the ideas about living sustainably embodied in his 'ten commandments'.

A Chain of Thunder Jeff Shaara, 2014-05-06 NEW YORK TIMES BESTSELLER Continuing the series that began with *A Blaze of Glory*, Jeff Shaara returns to chronicle another decisive chapter in America's long and bloody Civil War. In *A Chain of Thunder*, the action shifts to the fortress city of Vicksburg, Mississippi. There, in the vaunted "Gibraltar of the Confederacy," a siege for the ages will cement the reputation of one Union

general—and all but seal the fate of the rebel cause. In May 1863, after months of hard and bitter combat, Union troops under the command of Major General Ulysses S. Grant at long last successfully cross the Mississippi River. They force the remnants of Confederate Lieutenant General John C. Pemberton's army to retreat to Vicksburg, burning the bridges over the Big Black River in its path. But after sustaining heavy casualties in two failed assaults against the rebels, Union soldiers are losing confidence and morale is low. Grant reluctantly decides to lay siege to the city, trapping soldiers and civilians alike inside an iron ring of Federal entrenchments. Six weeks later, the starving and destitute Southerners finally surrender, yielding command of the Mississippi River to the Union forces on July 4—Independence Day—and marking a crucial turning point in the Civil War. Drawing on comprehensive research and his own intimate knowledge of the Vicksburg Campaign, Jeff Shaara once again weaves brilliant fiction out of the ragged cloth of historical fact. From the command tents where generals plot strategy to the ruined mansions where beleaguered citizens huddle for safety, this is a panoramic portrait of men and women whose lives are forever altered by the siege. On one side stand the emerging legend Grant, his irascible second William T. Sherman, and the youthful "grunt" Private Fritz Bauer; on the other, the Confederate commanders Pemberton and Joseph Johnston, as well as nineteen-year-old Lucy Spence, a civilian doing her best to survive in the besieged city. By giving voice to their

experiences at Vicksburg, *A Chain of Thunder* vividly evokes a battle whose outcome still reverberates more than 150 years after the cannons fell silent. Praise for *A Chain of Thunder* “[Jeff] Shaara continues to draw powerful novels from the bloody history of the Civil War. . . . The dialogue intrigues. Shaara aptly reveals the main actors: Grant, stoic, driven, not given to micromanagement; Sherman, anxious, high-strung, engaged even when doubting Grant’s strategy. . . . Worth a Civil War buff’s attention.”—Kirkus Reviews “Searing . . . Shaara seamlessly interweaves multiple points of view, as the plot is driven by a stellar cast of real-life and fictional characters coping with the pivotal crisis. . . . [A] riveting fictional narrative.”—Booklist “Shaara’s historical accuracy is faultless, and he tells a good story. . . . The voices of these people come across to the reader as poignantly as they did 150 years ago.”—Historical Novels Review “The writing is picturesque and vibrant. . . . [an] engrossing tale.”—Bookreporter

Godard On Godard Jean-luc Godard, 1986-03-22

Jean-Luc Godard, like many of his European contemporaries, came to filmmaking through film criticism. This collection of essays and interviews, ranging from his early efforts for *La Gazette du Cinéma* to his later writings for *Cahiers du Cinéma*, reflects his dazzling intelligence, biting wit, maddening judgments, and complete unpredictability. In writing about Hitchcock, Welles, Bergman, Truffaut, Bresson, and Renoir, Godard is also writing about himself-his

own experiments, obsessions, discoveries. This book offers evidence that he may be even more original as a thinker about film than as a director. Covering the period of 1950-1967, the years of *Breathless*, *A Woman Is a Woman*, *My Life to Live*, *Alphaville*, *La Chinoise*, and *Weekend*, this book of writings is an important document and a fascinating study of a vital stage in Godard's career. With commentary by Tom Milne and Richard Roud, and an extensive new foreword by Annette Michelson that reassesses Godard in light of his later films, here is an outrageous self-portrait by a director who, even now, continues to amaze and bedevil, and to chart new directions for cinema and for critical thought about its history.

Americana Kyle Marshall, 2019-09-28 Set between the sound and the sea, Long Island is home to some of America's most intriguing country houses. This book highlights the best examples, telling the story of each through outstanding contemporary color photography. The dwellings, which began as

17th-century homesteads and 18th-century, high-style plantation manor houses, embody centuries of ownership and building activity--an aesthetic evolution shaped by both Dutch and English colonial influences and proximity to the cultural crossroads of Long Island Sound and New York City. These many-layered homes, both large and small, have anchored successive generations engaged in living well amid evolving American taste, each generation expanding, altering, and redefining them in accordance with popular trends and personal eccentricities. Representing the best of maverick Americana, their charmed interiors exude warmth, comfort, and familiarity and contain wonderful old objects and materials that will satiate all who hunger for old houses.
