Owning the Olympics Monroe Price,Daniel Dayan,2009-12-10 A major contribution to the study of global events in times of global media. Owning the Olympics tests the possibilities and limits of the concept of 'media events' by analyzing the mega-event of the information age: the Beijing Olympics. . . . A good read from cover to cover. -Guobin Yang, Associate Professor, Asian/Middle Eastern Cultures & Sociology, Barnard College, Columbia University From the moment they were announced, the Beijing Games

were a major media event and the focus of intense scrutiny and speculation. In contrast to earlier such events, however, the Beijing Games are also unfolding in a newly volatile global media environment that is no longer monopolized by broadcast media. The dramatic expansion of media outlets and the growth of mobile communications technology have changed the nature of media events, making it significantly more difficult to regulate them or control their meaning. This volatility is reflected in the multiple, well-publicized controversies characterizing the run-up to Beijing 2008. According to many Western commentators, the People's Republic of China seized the Olympics as an opportunity to reinvent itself as the New China---a global leader in economics, technology, and environmental issues, with an improving human-rights record. But China's maneuverings have also been hotly contested by diverse global voices, including prominent human-rights advocates, all seeking to displace the official story of the Games. Bringing together a distinguished group of scholars from Chinese studies, human rights, media studies, law, and other fields, *Owning the Olympics* reveals how multiple entities---including the Chinese Communist Party itself---seek to influence and control the narratives through which the Beijing Games will be understood. *digitalculturebooks* is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication. **Free Culture** Lawrence Lessig, 2015-11-13 How big media uses technology and the law to lock down culture and control creativity. Free Culture is an entertaining and important look at the past and future of the cold war between the media industry and new technologies. - Marc Andreessen, cofounder of Netscape. These new-style heroes and examples are rooted in the traditions of the founding fathers in ways that seem obvious after reading this book. **Artificial Hells** Claire Bishop, 2012-07-24 Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as social practice. Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Paweł Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and

aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

**Under the Net** Iris Murdoch, 1977-10-27 Iris Murdoch's debut—a comic novel about work and love, wealth and fame Jake Donaghue, garrulous artist, meets Hugo Bellfounder, silent philosopher. Jake, hack writer and sponger, now penniless flat-hunter, seeks out an old girlfriend, Anna Quentin, and her glamorous actress sister, Sadie. He resumes acquaintance with the formidable Hugo, whose 'philosophy' he once presumptuously dared to interpret. These meetings involve Jake and his eccentric servant-companion, Finn, in a series of adventures that include the kidnapping of a film-star dog and a political riot on a film set of ancient Rome. Jake, fascinated, longs to learn Hugo's secret. Perhaps Hugo's secret is Hugo himself? Admonished, enlightened, Jake hopes at last to become a real writer.

**A Psalm for the Wild-Built** Becky Chambers, 2021-07-13 Winner of the Hugo Award! In *A Psalm for the Wild-Built*, bestselling Becky Chambers's delightful new Monk and Robot series, gives us hope for the future. It's been centuries since the robots of Panga gained self-awareness and laid down their tools; centuries since they wandered, en masse, into the wilderness, never to be seen again; centuries since they faded into myth and urban legend. One day, the life of a tea monk is upended by the arrival of a robot, there to honor the old promise of checking in. The robot cannot go back until the question of what do people need? is answered. But the answer to that question depends

on who you ask, and how. They're going to need to ask it a lot. Becky Chambers's new series asks: in a world where people have what they want, does having more matter? At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**The Dolphin Way** Shimi Kang, 2014-05-01 In this inspiring book, Harvard-trained child and adult psychiatrist and expert in human motivation Dr. Shimi Kang provides a guide to the art and science of inspiring children to develop their own internal drive and a lifelong love of learning. Drawing on the latest neuroscience and behavioral research, Dr. Kang shows why pushy “tiger parents” and permissive “jellyfish parents” actually hinder self-motivation. She proposes a powerful new parenting model: the intelligent, joyful, playful, highly social dolphin. Dolphin parents focus on maintaining balance in their children’s lives to gently yet authoritatively guide them toward lasting health, happiness, and success. As the medical director for Child and Youth Mental Health community programs in Vancouver, British Columbia, Dr. Kang has witnessed firsthand the consequences of parental pressure: anxiety disorders, high stress levels, suicides, and addictions. As the mother of three children and as the daughter of immigrant parents who struggled to give their children the “best” in life—Dr. Kang’s mother could not read and her father taught her math while they drove around in his taxicab—Dr. Kang argues that often the simplest “benefits” we give our children are the most valuable. By trusting our deepest intuitions about what is best for our kids, we will in turn allow them to develop key dolphin traits to enable them to thrive in an increasingly complex world: adaptability, community-mindedness, creativity, and critical thinking. Life is a journey through ever-changing waters, and dolphin parents know that the most valuable help we can give our children is to assist them in developing their own inner compass. Combining irrefutable science with unforgettable real-life stories, *The Dolphin Way* walks readers through Dr. Kang’s four-part method for cultivating self-motivation. The book makes a powerful case that we are not forced to choose

between being permissive or controlling. The third option—the option that will prepare our kids for success in a future that will require adaptability—is the dolphin way.

**Blindness and Writing** Heather Tilley, 2018 In this innovative and important study, Heather Tilley examines the huge shifts that took place in the experience and conceptualisation of blindness during the nineteenth century, and demonstrates how new writing technologies for blind people had transformative effects on literary culture. Considering the ways in which visually-impaired people used textual means to shape their own identities, the book argues that blindness was also a significant trope through which writers reflected on the act of crafting literary form. Supported by an illuminating range of archival material (including unpublished letters from Wordsworth's circle, early ophthalmologic texts, embossed books, and autobiographies) this is a rich account of blind people's experience, and reveals the close, and often surprising personal engagement that canonical writers had with visual impairment. Drawing on the insights of disability studies and cultural phenomenology, Tilley highlights the importance of attending to embodied experience in the production and consumption of texts.
