Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The World's Oldest Alphabet Douglas Petrovich,2016 For about 150 years, scholars have attempted to identify the language of the world's first alphabetic script, and to translate some of the inscriptions that use it. Until now, their attempts have accomplished little more than identifying most of the pictographic letters and translating a few of the Semitic words. With the publication of The World's Oldest Alphabet, a new day has dawned. All of the disputed letters have been resolved, while the language has been identified conclusively as Hebrew, allowing for the translation of 16 inscriptions that date from 1842 to 1446 BC. It is the author's reading that these inscriptions expressly name three biblical figures (Asenath, Ahisamach, and Moses) and greatly illuminate the earliest Israelite history in a way that no other book has achieved, apart from the Bible.
