*The Knight and the Dragon* Tomie dePaola, 1998-02-03 What happens when a sheepish knight and a not-so-fierce dragon fight for the very first time? Well, it's no ordinary battle since the knight has to go to the castle library to learn about dragon-fighting and the dragon must dig through his ancestor's things to find out how to fight a knight! Spontaneity of line and feeling are backed by zesty colors and a jovial, tongue-in-cheek tone to which children can relate—a top springtime choice. —Booklist There's a swirl of good-humored life to the book. —The New York Times Book Review

*The Good Ship* Ian Friel, 1995 The Middle Ages were a time of great innovation in shipbuilding, yet medieval maritime technology is often overlooked. This book traces the developments in rigging and shipbuilding in northern Europe over the medieval period, such as the adoption of the lateen rig with two or more masts.

**The Cultural Identities of European Cities** Katia Pizzi, 2010 Cities are both real and imaginary places whose identity is dependent on their distinctive heritage: a network of historically transmitted cultural resources. The essays in this volume, which originate from a lecture series at the Institute of Germanic & Romance Studies, University of London, explore the complex and multi-layered identities of European cities. Themes that run through the essays include: nostalgia for a grander past; location between Eastern and Western ideologies, religions and cultures; and the fluidity and palimpsest quality of city identity. Not only does the book provide different thematic angles and a variety of approaches to the investigation of city identity, it also emphasizes the importance of diverse cultural components. The essays presented here discuss cultural forms as various as music, architecture, literature, journalism, philosophy, television, film, myths, urban planning and the naming of streets.

Matilda Catherine Hanley, 2019-04-23 A life of Matilda—empress, skilled military leader, and one of the greatest figures of the English Middle Ages Matilda was a daughter, wife, and mother. But she was also empress, heir to the English crown—the first woman ever to hold the position—and an able military general. This new biography explores Matilda's achievements as military and political leader, and sets her life and career in full context. Catherine Hanley provides fresh insight into Matilda's campaign to claim the title of queen, her approach to allied kingdoms and rival rulers, and her role in the succession crisis. Hanley highlights how Matilda fought for the throne, and argues that although she never sat on it herself her reward was to see her son become king. Extraordinarily, her line has continued through every single monarch of England or Britain from that time to the present day.

Red City, Blue Period Temma Kaplan, 1992 This is not just another book: it is a major achievement.—Eric R. Wolf, author of *Europe and the People Without History*

**Building the Wooden Fighting Ship** James Dodds, James Moore, 2022-01-30 A fascinating account of the building of an historic ship, as well as a vivid and often surprising account of life and labour in the eighteenth century. In an age before industrialisation, the warship was the most complex object built by man and employed the most advanced technology of its time. Naval vessels of the period were, not surprisingly, so expensive to construct that meticulous records were kept, from the purchasing of timbers to the last details of their furnishings and armament, including even the individual names of some of the shipwrights and craftsmen. By carefully studying these records, the authors of *Building the Wooden Fighting Ship* have reconstructed, in extraordinary detail, the building of HMS *Thunderer*—a two-decked, 74-gun ship-of-the-line. In words and specially drawn illustrations, contemporary prints and paintings, the authors show every stage of the building of this ship, from the purchase and cutting of timbers right through to the launch in

1760. There are descriptions of Woolwich dockyard where she was built and details of all the skills and trades involved in her construction. First published in 1984, this book is a beautiful and highly informative work on a significant aspect of the Royal Navy and will appeal to enthusiasts, modellers, historians, and anyone with an interest in traditional crafts. Praise for *Building the Wooden Fighting Ship* "This book will appeal to model builders who focus on the Age of Sail and anyone interested in how these incredible pieces of art and engineering were constructed." —Nautical Research Journal "Dodds is both a shipwright and an artist, whose black and white drawings provide readers with a clear understanding of each facet along the way. Moore sails yachts and writes books about ships. Their expertise shines through, turning what might be a ho-hum dry treatise on shipbuilding into a fascinating and easy-to-understand narrative. Originally published in 1984, this new edition is beautifully rendered and well worth the price. There are so many details presented that even those familiar with ship construction will discover new tidbits of information, while those with little understanding of the industry will come away with a deeper appreciation of what it took to build one wooden fighting ship out of more than 3,400 oak trees." —Pirates and Privateers

Settlement Change Across Medieval Europe Niall Brady, Claudia Theune, 2019-09-09 Innovations, transmissions and transformations had profound spatial, economic and social impacts on the environments, landscapes and habitats evident at micro- and macro-levels. This volume explores how these changes affected how land was worked, how it was organized, and the nature of buildings and rural complexes.

The Later Italian Pictures in the Collection of Her Majesty the Queen Michael Levey, 1991 This is a revised and greatly expanded edition of a book first published in 1964 by Phaidon Press, and it catalogues in detail over 350 pictures painted since c. 1600. It thus complements *The Early Italian Pictures* by John Shearman which was published by Cambridge in 1983. The catalogue includes the work of many great painters - Domenichino, Guercino, Guido Reni, Batoni, the two Ricci, Annibale Carracci, Zuccarelli and a famous, unrivalled group of paintings by Canaletto, most of which were commissioned directly from the artist by Joseph Smith and subsequently bought with the rest of his collection by George III. A long introduction traces the history from Charles I onwards of English royal interest in Italian pictures of the seventeenth- and eighteenth-centuries.

**Ancient and Modern Gems and Jewels** Cristina Piacenti Aschengreen, John Boardman, 2008 This catalogue is the first comprehensive study of the 328 objects that make up this little-known area of the Royal Collection. The ancient gems and intaglios have been catalogued by John Boardman, and although they are few in number, they include the magnificent Claudius cameo that was once in the collection of Charles I. The later, post-Renaissance pieces have been studied by Kirsten Aschengreen Piacenti, and these include the great Tudor portrait cameos, a superb series of Italian sixteenth-century portrait cameos of North Italian 'Beauties', the group of exquisite eighteenth-century Italian carnelians bought by George III from Consul Smith in 1762 and a fine selection of Garter badges, several bearing the signature of the gem-engravers Marchant and Burch. Close examination by gemmologists has produced an accurate technical analysis of all the stones and settings, and newly commissioned photographs bring out the distinctive features of each piece. Casts are illustrated wherever possible, and close-up images of signatures, inscriptions and hallmarks support the detailed descriptions in the text. Research into the collection has resulted in new information concerning the mounts of many of the gems, and this is summarised in an illustrated appendix. Also published in full, and for the first time, is the collection of intaglios once owned by Henry, Prince of Wales, which was recorded in a series of wax impressions made by Elias Ashmole at the request of Charles II in June

**French Romance of the Later Middle Ages** Rosalind Brown-Grant,2008-11-13 This book will be of interest not only to students and scholars of medieval French literature but also to students and specialists of other medieval European languages, as well as to medieval historians, and those working in gender studies.--BOOK JACKET.

**The Dissertation** Iain Borden,2006-08-14 The Dissertation is one of the most demanding yet potentially most stimulating components of an architectural course. Properly done, it can be a valuable contribution not only to the students own learning development but also to the field of architecture as a whole. This book provides a complete guide to what to do, how to do it, when to do it, and the major pitfalls involved. This is a comprehensive guide to all that an architecture student might need to know about undertaking the dissertation, including new material on CD-ROM and online sources, web based research techniques, digital images, alternative imaging strategies, key architecture links, referencing and new dissertation extracts. It clearly navigates the student through the whole process of writing, preparing and submitting a dissertation, as well as suggesting what to do after the dissertation has been completed. Subjects covered include how to write a proposal, which research methodologies and techniques to adopt, which libraries and archives to utilize (including special architectural resources on the net), as well as how to structure, reference and illustrate the final submission. The authors also take architecture students into new terrain, suggesting alternative methods of undertaking dissertations, whether as video, prose writing, multimedia or other forms of expression. Furthermore, this guide includes new examples of exemplary dissertations of all kinds, as completed by students in Europe and North America so that the reader can clearly see the kinds of work which they themselves might choose to pursue. Also in the Seriously Useful Guides Series: \* The Crit \* The The Portfolio \* Practical Experience

**The Domestic and the Foreign in Architecture** Ruth Baumeister,Sang Lee,2007 For centuries, across nations, dialogue between the domestic and the foreign has affected and transformed architecture. Today these dialogues have become highly intensified. The Domestic and the Foreign in Architecture examines how these exchanges manifest themselves in contemporary architecture, in terms of its aesthetic potential and its practice, which, in turn, are impacted by broad economic, cultural and political issues. This book traces how diverse cultural encounters inevitably modify conventional categories, standards and codes of architecture, such as domestic identity, its political and economic representations and the negotiations with what is deemed foreign. Theoretical reflections by distinguished scholars are accompanied by interviews with some of the most influential architects practicing today, as well as stunning visual presentations by professional photographers.

*Joan, Lady of Wales* Danna R Messer,2020-09-30 The history of women in medieval Wales before the English conquest of 1282 is one largely shrouded in mystery. For the Age of Princes, an era defined by ever-increased threats of foreign hegemony, internal dynastic strife and constant warfare, the comings and goings of women are little noted in sources. This misfortune touches even the most well-known royal woman of the time, Joan of England (d. 1237), the wife of Llywelyn the Great of Gwynedd, illegitimate daughter of King John and half-sister to Henry III. With evidence of her hand in thwarting a full scale English invasion of Wales to a notorious scandal that ended with the public execution of her supposed lover by her husband and her own imprisonment, Joan's is a known, but little-told or understood story defined by family turmoil, divided loyalties and political intrigue. From the time her hand was promised in marriage as the result of the first Welsh-English alliance in 1201 to the end of her life, Joan's place in the political wranglings

between England and the Welsh kingdom of Gwynedd was a fundamental one. As the first woman to be designated Lady of Wales, her role as one a political diplomat in early thirteenth-century Anglo-Welsh relations was instrumental. This first-ever account of Siwan, as she was known to the Welsh, interweaves the details of her life and relationships with a gendered re-assessment of Anglo-Welsh politics by highlighting her involvement in affairs, discussing events in which she may well have been involved but have gone unrecorded and her overall deployment of royal female agency.

**Elemental Disappearances** Jason Bahbak Mohaghegh,Dejan Lukić,2016-11-28 Elemental Disappearances casts a wanderer's eye upon an ever-expanding configuration of sites of disturbance. The things sought after are apparitional: they appear and disappear at will; they perfect the art of materialization and vanishing. Such is the nature of living dangerously, and with it the short duration of enchantment. This collection tracks provocative ideas, artifacts, and phenomena rising and fading across different territories of the contemporary world. Through a constellation of powerful thought-images, the authors uncover spaces of an ephemeral and fugitive nature in order to generate a fractal vision of our time and beyond. (back cover)

**Hazel, & Other Poems** John Sjoberg,1976

Henry the Young King, 1155-1183 Matthew Strickland,2016-09-13 This first modern study of Henry the Young King, eldest son of Henry II but the least known Plantagenet monarch, explores the brief but eventful life of the only English ruler after the Norman Conquest to be created co-ruler in his father's lifetime. Crowned at fifteen to secure an undisputed succession, Henry played a central role in the politics of Henry II's great empire and was hailed as the embodiment of chivalry. Yet, consistently denied direct rule, the Young King was provoked first into heading a major rebellion against his father, then to waging a bitter war against his brother Richard for control of Aquitaine, dying before reaching the age of thirty having never assumed actual power. In this remarkable history, Matthew Strickland provides a richly colored portrait of an all-but-forgotten royal figure tutored by Thomas Becket, trained in arms by the great knight William Marshal, and incited to rebellion by his mother Eleanor of Aquitaine, while using his career to explore the nature of kingship, succession, dynastic politics, and rebellion in twelfth-century England and France.

**Understanding Music** N. Alan Clark,Thomas Heflin,Jeffrey Kluball,2015-12-21 Music moves through time; it is not static. In order to appreciate music we must remember what sounds happened, and anticipate what sounds might come next. This book takes you on a journey of music from past to present, from the Middle Ages to the Baroque Period to the 20th century and beyond!
