Zoological World is a visually stunning and broad-ranging survey that explores and celebrates humankind's ongoing fascination with animals. Since our very first moments on Earth, we have been compelled to make images of the curious beasts around us - whether as sources of food, danger, wonder, power, scientific significance or companionship. This carefully curated selection of images, chosen by an international panel of experts, delves into our shared past to tell the story of animal life. From the first cave paintings, extraordinary medieval bestiaries and exquisite scientific illustration, to iconic paintings, contemporary artworks and the incredible technological advancements that will shape our futures together, the huge range of works reflects the beauty and variety of animals themselves - including butterflies, hummingbirds, bats, frogs, tigers, dogs, jellyfish, spiders and elephants, to name a few. Arranged in a curated and thought-provoking sequence, this engaging compilation includes iconic works by some of the great names in zoology, such as Conrad Gesner, Charles Darwin and John James Audubon, as well as celebrated artists and photographers, indigenous cultures and lesser-known figures who have made important contributions to the study and representation of animals throughout history.

Emi and the Rhino Scientist Mary Kay Carson, 2007 Terri Roth trudges through the thick, dark Sumatran jungle. She's looking for a rhinoceros that's been seen in the area. It's a rare Sumatran rhino, the world's smallest rhino and one of the most endangered mammals on the planet. Suddenly she spots a young female rhino through the tangle of ferns and trees. The stocky animal is covered in reddish hair, and her snout sports two stubby horns. The rhino walks right up to Terri. The scientist slowly reaches out her hand and touches the rhino's big nose. The wild rhino's curiosity and friendliness remind Terri of Emi, the female

Sumatran rhino that lives at the Cincinnati Zoo where Terri works. Terri is working with Emi to help save Sumatran rhinos from extinction--one calf at a time.

Gorgeous Beasts Joan B. Landes,Paula Young Lee,Paul Youngquist,2015-06-26
Gorgeous Beasts takes a fresh look at the place of animals in history and art. Refusing the

traditional subordination of animals to humans, the essays gathered here examine a rich variety of ways animals contribute to culture: as living things, as scientific specimens, as food, weapons, tropes, and occasions for thought and creativity. History and culture set the terms for this inquiry. As history changes, so do the ways animals participate in culture. *Gorgeous Beasts* offers a series of discontinuous but probing studies of the forms their participation takes. This collection presents the work of a wide range of scholars, critics, and thinkers from diverse disciplines: philosophy, literature, history, geography, economics, art history, cultural studies, and the visual arts. By approaching animals from such different perspectives, these essays broaden the scope of animal studies to include specialists and nonspecialists alike, inviting readers from all backgrounds to consider the place of animals in history and art. Combining provocative critical insights with arresting visual imagery, *Gorgeous Beasts* advances a challenging new appreciation of animals as co-inhabitants and co-creators of culture. Aside from the editors, the contributors are Dean Bavington, Ron Broglio, Mark Dion, Erica Fudge, Cecilia Novero, Harriet Ritvo, Nigel Rothfels, Sajay Samuel, and Pierre Serna.

How to Make Tiny Paper Mache Dogs Jonni Good, 2014-05 The author makes it easy for you to create a tiny paper mache dog of your own. You only need a few basic tools and some materials that you may already have lying around the house. The only thing you may need to purchase is a few feet of aluminum wire for the armature -- or use some wire you already have on hand. First, choose a pattern from the 27 breeds included in the book. Then build your armature by bending the wires, using the pattern for a guide. This makes sure

that your finished sculpture will have the right proportions for your breed. Add a few bits of crumpled aluminum foil to round out the forms, with the pattern guiding you, and then twist and bend your little dog into any position you desire. With these simple steps it's easy to create a lively original sculpture of your own design. When your armature is finished, the author shows you how to make the two layers of paper mache as smooth as you want it to be. You can add wrinkles, fur, happy mouths and other details after the paper mache is dry. If you would like to paint your dog, you can use the author's recipe for an inexpensive home-made gesso to add interesting textures. Then the author gives you suggestions for painting your sculpture, including an easy way to paint brindled spots, how to give an all-white dog an interesting coat, how to emphasize heavily-textured fur with acrylic glazing liquid, and more. The author is a well-known paper mache artist who has written several popular books on the subject. She also writes tutorials and creates videos for her blog, at UltimatePaperMache.com.

The Rhinoceros and the Megatherium Juan Pimentel, 2017-01-09 How did Europeans three centuries apart respond to two mysterious beasts—a living rhinoceros previously known only from ancient texts and a nameless monster's massive bones? Juan Pimentel shows that their reactions reflect deep cultural changes but also the enduring power of image and imagination to shape our understanding of the natural world.
