One Girl Andrea Beaty,2020-10-06 A meditative picture book about the power of reading and how one child can change the world, from #1 bestselling author Andrea Beaty One girl. One spark. Faint and fading in the dark. Flicker . . . Flicker . . . Flicker . . . Glow. Tiny ember. Burning low. Inspired by the global movement to empower girls through education, this lyrical story tells of one small girl who reads a book that lights a spark. She shares what she learns with her class, and the spark grows. The girl is then moved to write her own story, which she shares with girls around the globe, and it ignites a spark in them, lighting up the whole world. Making Simple Robots Kathy Ceceri,2015-02-19 Making Simple Robots is based on one idea: Anybody can build a robot! That includes kids, school teachers, parents, and non-engineers. If you can knit, sew, or fold a flat piece of paper into a box, you can build a no-tech robotic part. If you can use a hot glue gun, you can learn to solder basic electronics into a low-tech robot that reacts to its environment. And if you can figure out how to use the apps on your smart phone, you can learn enough programming to communicate with a simple robot. Written in language that non-engineers can understand, Making Simple Robots helps beginners move beyond basic craft skills and materials to the latest products and tools being used by artists and inventors. Find out how to animate folded paper origami, design a versatile robot wheel-leg for 3D printing, or program a rag doll to blink its cyborg eye. Each project includes step-by-step directions as well as clear diagrams and photographs. And every chapter offers suggestions for modifying and expanding the projects, so that you can return to the projects again and again as your skill set grows.

2019 IEEE-RAS 19th International Conference on Humanoid Robots (Humanoids). ,2019

The DARPA Robotics Challenge Finals: Humanoid Robots To The Rescue Matthew Spenko,Stephen Buerger,Karl Iagnemma,2018-04-09 The DARPA Robotics Challenge was a robotics competition that took place in Pomona, California USA in June 2015. The competition was the culmination of 33 months of demanding work by 23 teams and required humanoid robots to perform challenging locomotion and manipulation tasks in a mock disaster site. The challenge was conceived as a response to the Japanese Fukushima nuclear disaster of March 2011. The Fukushima disaster was seen as an ideal candidate for robotic intervention since the risk of exposure to radiation prevented human responders from accessing the site. This volume, edited by Matthew Spenko, Stephen Buerger, and Karl Iagnemma, includes commentary by the organizers, overall analysis of the results, and documentation of the technical efforts of 15 competing teams. The book provides an important record of the successes and failures involved in the DARPA Robotics Challenge and provides guidance for future needs to be addressed by policy makers, funding agencies, and the robotics research community. Many of the papers in this volume were initially published in a series of special issues of the Journal of Field Robotics. We have proudly collected versions of those papers in this STAR volume.

Craft Notes for Animators Ed Hooks,2016-12-01 If Disney's Snow White and the Seven Dwarfs represented the Animation industry's infancy, Ed Hooks thinks that the current production line of big-budget features is its artistically awkward adolescence. While a well-funded marketing machine can conceal structural flaws, uneven performances and superfluous characters, the importance of crafted storytelling will only grow in importance as animation becomes a broader, more accessible art form. Craft Notes for Animators analyses specific films - including Frozen and Despicable Me - to explain the secrets of creating truthful stories and believable characters. It is an essential primer for the for tomorrow's industry leaders and animation artists.

Some Of Myself Suzanne D Williams,2022-02-14 I can't do this again, she cried. I can't. It'll be like last time, and my life will be ruined. I just wanted to start over. Shh. No, it won't. You have me. The last thing Eden Riske expected when she came home was the discernment of fellow teacher Austin Lowell. Football coach, history teacher, fitness buff, Austin is strength and patience in a handsome package. However, it seems even his presence can't stop the rumors swirling around her or the hatred of someone determined to do her harm. But this job is supposed to be her salvation, her way out of her troubled past. Except now, everything is falling apart, and the one thing that might destroy her is the very secret she's held inside for so long.

Heartificial Intelligence John Havens, 2016-02-02 Algorithms will soon know more about us than we know ourselves Where should machine automation end? Is it acceptable to have a digital assistant arrange your calendar, but not to have a robot spouse? Are companion robots acceptable for seniors in need of comfort, but not okay for toddlers exposed to emotional software that could influence their behavior? Is it desirable to live a life within the virtual reality of Facebook's Oculus Rift, but not if your thoughts are sold to advertisers who manipulate your purchases? We've entered an era where a myriad of personalization algorithms influence our every decision, and the lines between human assistance, automation, and extinction have blurred. We need to create ethical standards for the Artificial Intelligence usurping our lives, and allow individuals to control their identity based on their values. Otherwise, we sacrifice our humanity for productivity versus purpose and for profits versus people. Featuring pragmatic solutions drawing on economics, emerging technologies, and positive psychology, Heartificial Intelligence provides the first values-driven approach to algorithmic living—a definitive roadmap to help humanity embrace the present and positively define their future. Each chapter opens with a fictional vignette, helping readers imagine how they would respond to various Artificial Intelligence scenarios while demonstrating the need to codify their values, as the algorithms dominating society today are already doing. Funny, poignant, and accessible, this book paints a vivid portrait of how our lives might look in either a dystopia of robotic and corporate dominance, or a utopia where humans use technology to enhance our natural abilities to evolve into a long-lived, super-intelligent, and altruistic species.
