The American Speed Shop Bob McClurg,2021-02-15 The history of hot rodding and performance cars has been well chronicled through the years. Books and magazines have covered the cars, builders, pioneers, engineers, early racers, muscle cars, street racers, etc. Most take a nostalgic and fun look at the cars that many have loved their entire lives. Some even cover the lifestyle, the hobby as it involves people, and the effort, time, and commitment people put into it. It is more than just a hobby to most, and to many, a certain wave of nostalgia comes over them when remembering what the car scene was like back in the day. The local speed shop is an important element of the nostalgic feeling that people have when fondly remembering their hot rodding youth. Speed shops were not just parts stores, they were a communal gathering place for car guys wanting to talk smart, bench race, and catch up on the local scene, as well as to solicit the expert advice from the owner or staff behind the counter. Here, longtime hot rodder and industry veteran Bob McClurg brings you the story of the era and the culture of speed shops as told through individual shop's histories and compelling vintage photography. He covers the birth of the industry, racing versus hot rodding, mail-order, and advertising wars. You learn about the performance boom of the 1960s and 1970s, lost speed shops as well as survivors, and a overview of the giant mail-order speed shops of today.

Advances on P2P, Parallel, Grid, Cloud and Internet Computing Fatos Xhafa,Santi
 Caballé,Leonard Barolli,2017-11-02 This book presents the latest, innovative research findings on
 P2P, Parallel, Grid, Cloud, and Internet Computing. It gathers the Proceedings of the 12th
 International Conference on P2P, Parallel, Grid, Cloud and Internet Computing, held on November
 8-10, 2017 in Barcelona, Spain. These computing technologies have rapidly established themselves
 as breakthrough paradigms for solving complex problems by enabling the aggregation and sharing
 of an increasing variety of distributed computational resources at large scale. Grid Computing
 originated as a paradigm for high-performance computing, offering an alternative to expensive
 supercomputers through different forms of large-scale distributed computing, while P2P Computing
 emerged as a new paradigm after client-server and web-based computing and has shown to be
 useful in the development of social networking, B2B (Business to Business), B2C (Business to
 Consumer), B2G (Business to Government), B2E (Business to Employee), and so on. Cloud
 Computing has been defined as a “computing paradigm where the boundaries of computing are
 determined by economic rationale rather than technical limits”. Cloud computing has quickly been
 adopted in a broad range of application domains and provides utility computing at large scale.
 Lastly, Internet Computing is the basis of any large-scale distributed computing paradigm; it has
 very rapidly developed into a flourishing field with an enormous impact on today’s information
 societies, serving as a universal platform comprising a large variety of computing forms such as
 Grid, P2P, Cloud and Mobile computing. The aim of the book “Advances on P2P, Parallel, Grid, Cloud
 and Internet Computing” is to provide the latest findings, methods and development techniques from
 both theoretical and practical perspectives, and to reveal synergies between these large-scale
 computing paradigms.

Soy-Based Bioplastics Vijay Kumar Thakur, 2017-11-01 Soy and its coproducts are rapidly emerging as one of the most prominent sustainable plastics of the 21st century. The relative abundance of soy and its functional and thermoplastic properties, low cost, and biodegradable characteristics have made it a material of great interest for widespread use in the plastics industry. As most of the functional properties of the final products are directly related to the physico-chemical properties of the raw material, a detailed knowledge of the inherent characteristics of soy-based materials is essential for understanding and manipulating their properties for better end-user applications. This book summarises in a most comprehensive manner the recent technical research accomplishments in the area of soy-based bioplastics. The prime aim and focus of this book is to present recent advances in the processing and applications of soy-based biopolymers as potential bioplastics. It reflects recent theoretical advances and experimental results, and opens new avenues for researchers as well as readers working in the field of plastics and sustainable materials. The different topics covered in this book include: structural analysis of soy-based materials; soy/biopolymer blends; films, fibres, foams, and composites; and different advanced applications.
