US Patrol Torpedo Boats Gordon L. Rottman,2011-12-20 ALSO AVAILABLE AS AN E-BOOK. Motor torpedo boat development began in the early 1900s, and the vessels first saw service during World War I. However, it was not until the late 1930s that the US Navy commenced the development of the Patrol Torpedo or PT boat. The PT boat was designed for attacking larger warships with torpedoes using its 'stealth' ability, high-speed and small size to launch and survive these attacks – although they were employed in a wide variety of other missions, including rescuing General MacArthur and his entourage from the Philippines. This book examines the design and development of these unique craft, very few of which survive today, and goes on to examine their role and combat deployment in World War II.

Deep Maneuver Jack D Kern Editor,Jack Kern,2018-10-12 Volume 5, Deep Maneuver: Historical Case Studies of Maneuver in Large-Scale Combat Operations, presents eleven case studies from World War II through Operation Iraqi Freedom focusing on deep maneuver in terms of time, space and purpose. Deep operations require boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two

chapters address these considerations for future Deep Maneuver.

Hiroshima John Hersey,2020-06-23 Hiroshima is the story of six people—a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest—who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey went back to Hiroshima in search of the people whose stories he had told, and his account of what he discovered is now the eloquent and moving final chapter of Hiroshima.

Amtracs Steven J. Zaloga,1999-09-01 The first prototype for the LVT (Landing Vehicle Tracked) was completed in July 1941, its design based on the Alligator, a tracked amphibious vehicle developed for rescue operations in the swamps of Florida. Though the early conception of amtrac operations envisioned using LVTs solely as supply vehicles, at Tarawa amtracs demonstrated their utility as assault vehicles to carry troops, leading to the development of new models. This book covers the evolution of amtracs, from the first LVT-1 to the LVT-7; their numerous variants; and their use throughout World War II and beyond.

Iron Curtain Anne Applebaum,2012-10-30 In the long-awaited follow-up to her Pulitzer Prize-winning *Gulag*, acclaimed journalist Anne Applebaum delivers a groundbreaking history of how Communism took over Eastern Europe after World War II and transformed in frightening fashion the individuals who came under its sway. At the end of World War II, the Soviet Union to its surprise and delight found itself in control of a huge swath of territory in Eastern Europe. Stalin and his secret police set out to convert a dozen radically different countries to Communism, a completely new political and moral system. In *Iron Curtain*, Pulitzer Prize-winning journalist Anne Applebaum describes how the Communist regimes of Eastern Europe were created and what daily life was like once they were complete. She draws on newly opened East European archives, interviews, and personal accounts translated for the first time to portray in devastating detail the dilemmas faced by millions of individuals trying to adjust to a way of life that challenged their every belief and took away everything they had accumulated. Today the Soviet Bloc is a lost civilization, one whose cruelty, paranoia, bizarre morality, and strange aesthetics Applebaum captures in the electrifying pages of *Iron Curtain*.

British Mark I Tank 1916 David Fletcher,2004-06-24 In 1915 a machine christened Little Willie changed the way that wars were fought. Little Willie was a fully tracked armoured vehicle that could break a trench system. Its development was completed in December 1915, but by then it had already been superseded by an improved design, Mother. This was the first rhomboid tank, and the prototype for the Mark 1 which would influence a whole generation of tank building. This book details the development of the Mark I, and its surprise arrival in France in the middle of 1916 during the closing weeks of the battles of the Somme.
