Steven Universe Rebecca Sugar, 2019-10-08 The interactive story of magical beings from another world and how one very special boy came to be, by the New York Times–bestselling author of *The Answer*. Once upon a time, a silly, impossible little Gem named Pink Diamond ran away from her homeworld to the planet Earth. She transformed into Rose Quartz and gave up her existence to create a half-human child, Steven Universe. But so long as Steven has her Gem, can they BOTH exist? Is he her? Is she him? Is she trapped inside his Gem? This is so DISORIENTING! In a story unlike any other—made up of multiple points of view—who gets to tell the Tale of Steven? . . . The official picture-book adaptation of the *Steven Universe* special “Change Your Mind” by the series creator Rebecca Sugar. “The Tale of Steven is a storybook unlike any other, in an interactive format that tells the same story from multiple viewpoints, inviting the reader to interact with the story as they wish.” —The Hollywood Reporter “Beneath the surface Tale of Steven is a wonderfully smart commentary on bias and perspective, and how different points of view can all color and reframe the same story.” —Gizmodo “Challenging in all the right ways, heartstring-tugging and entertaining.” —Animation Magazine

Confessions of a Recovering Environmentalist and Other Essays Paul Kingsnorth, 2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide” Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he

saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, *Confessions of a Recovering Environmentalist* gathers the wave-making essays that have charted the change in Kingsnorth's thinking. In them he articulates a new vision that he calls "dark ecology," which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed "Uncivilization" manifesto, asks hard questions about how we've lived and how we should live.

Always Ready Greg Bahnsen, 1996-11 Christian Apologetics

Surfing Uncertainty Andy Clark, 2016 This title brings together work on embodiment, action, and the predictive mind. At the core is the vision of human minds as prediction machines - devices that constantly try to stay one step ahead of the breaking waves of sensory stimulation, by actively predicting the incoming flow. In every situation we encounter, that complex prediction machinery is already buzzing, proactively trying to anticipate the sensory barrage. The book shows in detail how this strange but potent strategy of self-anticipation ushers perception, understanding, and imagination simultaneously onto the cognitive stage.

Albion's Seed David Hackett Fischer, 1991-03-14 This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense,

nearly all Americans are Albion's Seed, no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Visions of Vocation Steven Garber, 2014-01-27 Foreword Review's Annual INDIEFAB Book of the Year Finalist Outreach Resource of the Year Christianity Today Award of Merit Leadership Journal Best Books for Church Leaders Book of the Year from Byron Berger, Hearts and Minds Bookstore Is it possible to know the world and still love the world? Of all the questions we ask about our calling, this is the most difficult. From marriages to international relations, the more we know, the harder it is to love. We become cynics or stoics, protecting our hearts from the implications of what we know. But what if the vision of vocation can be recovered—allowing us to step into the wounds of the world and for love's sake take up our responsibility for the way the world turns out? For decades Steve Garber has come alongside a wide range of people as they seek to make sense of the world and their lives. With him we meet leaders from the Tiananmen Square protest who want a good reason to still care about China. We also meet with many ordinary people in ordinary places who long for their lives to matter: Jonathan who learned he would rather build houses than study history Todd and Maria who adopted creative schedules so they could parent better and practice medicine D.J. who helped Congress move into the Internet Age Robin who spends her life on behalf of urban justice Hans who makes hamburgers the way they are meant to be made Susan who built a home business of hand-printing stationary using a letterpress Santiago who works with majority-world nations in need of capital George who has given years to teaching students to learn things that matter most Claudius

and Deirdre whose openhearted home has always been a place for people Dan who loves Wyoming, the place, its people and its cows Vocation is when we come to know the world in all its joy and pain and still love it. Vocation is following our calling to seek the welfare of the world we live in. And in helping the world to flourish, strangely, mysteriously, we find that we flourish too. Garber offers a book for everyone everywhere—for students, for parents, for those in the arts, in the academy, in public service, in the trades and in commerce—for all who want to discover the virtue of vocation.

The Astronaut Who Painted the Moon: The True Story of Alan Bean Dean Robbins, 2019-05-28
Journey to the moon on the Apollo 12 mission with Alan Bean, the fourth astronaut to walk on the lunar surface and the only artist to paint its beauty firsthand! As a boy, Alan wanted to fly planes. As a young navy pilot, Alan wished he could paint the view from the cockpit. So he took an art class to learn patterns and forms. But no class could prepare him for the beauty of the lunar surface some 240,000 miles from Earth. In 1969, Alan became the fourth man and first artist on the moon. He took dozens of pictures, but none compared to what he saw through his artistic eyes. When he returned to Earth, he began to paint what he saw. Alan's paintings allowed humanity to experience what it truly felt like to walk on the moon. Journalist and storyteller Dean Robbins's tale of this extraordinary astronaut is masterful, and artist Sean Rubin's illustrations are whimsical and unexpected. With back matter that includes photos of the NASA mission, images of Alan's paintings, and a timeline of lunar space travel, this is one adventure readers won't want to miss!

The Discovery of Cosmic Voids Laird A. Thompson, 2020-12-10 The large-scale structure of the Universe is dominated by vast voids with galaxies clustered in knots, sheets, and filaments, forming a great 'cosmic web'. In this personal account of the major astronomical developments leading to this discovery, we learn from Laird A. Thompson, a key protagonist, how the first 3D maps of galaxies were created. Using non-mathematical language, he introduces the standard model of cosmology before explaining how and why ideas about cosmic voids evolved, referencing the original maps, reproduced here. His account tells of the competing teams of observers, racing to publish their results, the theorists trying to build or update their models to explain them, and the subsequent large-scale survey efforts that continue to the present day. This is a well-documented account of the birth of a major pillar of modern cosmology, and a useful case study of the trials surrounding how this scientific discovery became accepted.

The Gospel at Work Sebastian Traeger, Greg D. Gilbert, 2014-01-28 Find God's vision for your job. Reclaim God's vision for your life. Many Christians fall victim to one of two main problems when it comes to work: either they are idle in their work, or they have made an idol of it. Both of these mindsets are deadly misunderstandings of how God intends for us to think about our employment. In *The Gospel at Work*, Sebastian Traeger and Greg Gilbert unpack the powerful ways in which the gospel can transform how we do what we do, releasing us from the cultural pressures of both an all-consuming devotion and a punch-in, punch-out mentality—in order to find the freedom of a work ethic

rooted in serving Christ. You'll find answers to some of the tough questions that Christians in the workplace often ask: What factors should matter most in choosing a job? What gospel principles should shape my thinking about how to treat my boss, my co-workers, and my employees? Is full-time Christian work more valuable than my job? Is it okay to be motivated by money? How do you prioritize—or balance—work, family and church responsibilities? Solidly grounded in the gospel, *The Gospel at Work* confronts both our idleness at work and our idolatry of work with a challenge of its own—to remember that whom we work for is infinitely more important than what we do.
