Paper Toys: Robots Arnaud Roi,2016-10 Paper Toys is a wonderful new series of interactive craft books that allow children to pop out and build their own paper toys. While complimentary, each volume in the series is designed by a different talented artist, lending a stylized look to their fanciful creations. With several themes to choose from including Robots, Monsters, Fantasy Creatures, and Animals, the options for imaginative play are endless. Printed on durable cardstock and die-cut, each toy is easy to assemble with no glue or scissors needed.

Papertoy Glowbots Brian Castleforte,2016-08-23 Origami meets amazing creatures in a book of paper craft fun! Papertoy Glowbots introduces 46 robots that have the added cool factor of lighting up, whether using glow-in-the-dark stickers that come with the book or light sources like flashlights, Christmas tree lights, and electric tea lights. The 46 die-cut paper robots are created by Brian Castleforte, author of Papertoy Monsters, along with the hottest papertoy designers from around the world. Meet the robots and read about their entertaining backstories in the front, then turn to the card stock section in the back to build them. The templates are die-cut and ready to pop out, fold, and glue. Bold, colorful graphics ensure the robots look as amazing in the daytime as they do with the lights off.

Papertoy Monsters Brian Castleforte,2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

Fundamentals of Robotics Prof Charria, 2013-10-11 Do you like robots? This book is intended as a reading book for children from 5 to 80 years old (ok, ok...from 5 to 8). Caution: This book requires that both, parents and children, work together at least 15 minutes a day on reading and assembling some robot pieces (only the printed version). Then main objective is to encourage parents and children to share quality time while learning by getting involved on two basic activities : Reading just one page and assembling just one of the robot's parts every day. The idea is that every parent and his(her) child spend some few minutes every day practicing reading, explaining the concepts for reading comprehension and learning about robotics. Every book has vocabulary for parents to help children to understand some difficult words from the world of Robots. Additionally, with very simple tools like glue and scissors, parents and children build the robot's parts, but again it's recommended to make just one robot part per day. This activity help to build children's imagination and creativity . It is a wonderful way to develop fine motor skills and something very important nowadays: patience. There are no instructions on how to fold the pieces. You don't have to worry because it's not that difficult and this exercise can help children to figure out geometric figures. Every reading session becomes a fun activity while kids see their own progress in several ways.

The more they read the closer they get to have their paper-craft robot as a final reward. Automated printing has limitations and though the desire is to have the paper-craft robot on a sheet with good thickness, we had to use the same paper thickness of the interior pages. Sorry no much control on this issue.

Chris Gall inspires kids to reuse, repurpose, and recycle in this inventive adventure about a boy superhero who turns trash into treasures--and saves the world while he's at it!

Cartoon and TV Robots Prof Charria,2013-12-15 Caution: This book requires that both, parents and children, work together at least 15 minutes a day on reading texts and assembling some robot pieces (only the printed version). Parents will remember all those TV and animated series where a robot was part of the cast. Children will learn about the robots and the importance of science.This is a reading book and also a historic compilation of robots appearing in Cartoon and TV Series. Do you like ROBOTS? This book is a reading book for children from 5 to 80 years old (OK, OK...from 5 to your age). The idea is that every parent and his(her) child spend some few minutes every day practicing reading, explaining the concepts for reading comprehension and learning about robotics.
