The Grace of Kings Ken Liu,2015-04-07 One of the Time 100 Best Fantasy Books Of All Time Two men rebel together against tyranny—and then become rivals—in this first sweeping book of an epic fantasy series from Ken Liu, recipient of Hugo, Nebula, and World Fantasy awards. Hailed as one of the best books of 2015 by NPR. Wily, charming Kuni Garu, a bandit, and stern, fearless Mata Zyndu, the son of a deposed duke, seem like polar opposites. Yet, in the uprising against the emperor, the two quickly become the best of friends after a series of adventures fighting against vast conscripted armies, silk-draped airships, and shapeshifting gods. Once the emperor has been overthrown, however, they each find themselves the leader of separate factions—two sides with very different ideas about how the world should be run and the meaning of justice. Fans of intrigue, intimate plots, and action will find a new series to embrace in the Dandelion Dynasty.

Understanding Media Marshall McLuhan,2016-09-04 When first published, Marshall McLuhan's Understanding Media made history with its radical view of the effects of electronic communications upon man and life in the twentieth century.

Do Androids Dream of Electric Sheep? Philip K. Dick,1975 By 2021, the Terminus War had driven mankind off-planet and entire species into extinction. Now only the rich can afford living creatures; others may buy amazingly realistic simulacra: horses, cats, sheep ... Even humans. These artificial people are so advanced it's impossible to tell them from true men and women--except for their lack of empathy. Without empathy, androids can--and do--kill their owners and blend into society, so they're illegal on Earth. It's Rick Deckard's job to find these rogues and retire them. But andys tend to fight back--with deadly results.

Dark Ecology Timothy Morton,2016-04-12 Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip, twisted to have only one side. Deckard travels this oedipal path in Blade Runner (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. Dark ecology puts us in an uncanny position of radical self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology, biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark, strange loop we traverse.

The Trials Linda Nagata,2015-08-18 In the wake of nuclear terrorism, a squad of elite soldiers must combat artificial intelligence and seek justice in this military political thriller, a sequel to The Red. Lieutenant James Shelley and his squad of US Army soldiers were on a quest for justice when they carried out the unauthorized mission known as First Light. They returned home to America to face a court-martial, determined to expose the corruption in the chain of command that compelled their actions. But in a country still reeling from the nuclear terrorism of Coma Day, the courtroom is just one battlefield of many. A new cycle of violence ignites when rumors of the elusive, rogue AI known as the Red go public—and Shelley is, once again, pulled into the fray. Challenged by his enemies, driven by ideals, Shelley feels compelled to act. But are the harrowing choices he makes really his own, or are they made for him, by the Red? And with millions of lives at stake in a game of nuclear cat-and-mouse, does the answer even matter?

Confessions of a Necromancer Pieter Hintjens,2016-10-01 Thirty-five years I've written code, a necromancer weaving spells to bring the dead to life. Hardware and electronics never held any charm for me. I've no love for chips and cables and solder. Give me a keyboard, a screen, and a language, and you have my attention. Thirty-five years produced a lot of work. So I thought, maybe time to talk about some of those projects.
