Designing the T-34 Peter Samsonov,2019-12-27 When the German army launched Operation Barbarossa – the invasion of the Soviet Union – on June 22, 1941, it was expecting to face and easily defeat outdated and obsolete tanks and for the most part it did, but it also received a nasty shock when it came up against the T-34. With its powerful gun and sloped armour, the T-34 was more than a match for the best German tanks at that time and the Germans regarded it with awe. German Field Marshal von Kleist, who commanded the latter stages of Barbarossa, called it –the finest tank in the world–. Using original wartime documents author and historian Peter Samsonov, creator of the Tank Archives blog, explains how the Soviets came to develop what was arguably the war’s most revolutionary tank design.

Sherman Tanks of the Red Army Peter Samsonov,2020-12-21 More than 4000 examples of the famous diesel-fueled M4A2 Sherman tank were sent to the Soviet Union during the Second World War under the Lend-Lease program. These American-built vehicles were operated by Red Army crews against the Germans during some of the bitterest fighting on the Eastern Front - yet despite serving with distinction and being well-liked by their crews, relatively little has been written about these vehicles until now. Tank expert Peter Samsonov looks at the origins of the M4A2 in Soviet service and the machines that were received from the US as well as providing a detailed assessment of how they fared in combat on the front line.

IS-2 Heavy Tank 1944–73 Steven J. Zaloga,2011-10-20 The Iosef Stalin tanks were the ultimate heavy tanks developed by the Soviet Union and were popularly called 'Victory tanks' due to their close association with the defeat of Germany in 1945. Yet in spite of their reputation, the Stalin tanks emerged from a troubled design, had a brief moment of glory in 1944 and 1945, and disappeared in ignominy after 1960. This title covers the events contributing to the Soviet Union's need to design the new series, with particular reference to the unsuccessful KV series and the advent of a new generation of heavy German tanks including the Tiger. It also covers their development, operational history and myriad variants.

Tiger Tanks at War Michael Green,James D. Brown,2008-02-15 The first prototype for the Tiger tank was set to be ready for Hitler's birthday on April 20, 1942. The Henschel Company, competing with Porsche, produced the superior model, and by August of that year the formidable Tiger--or Panzerkampfwagen VI Tiger Ausf. H.--was in full production. This book takes us behind the scenes with the Tiger tank, reviewing the full history, the design and mechanics, and the mixed record of this machine, which was designed to outgun its Russian counterparts. Military writer Michael Green offers a close-up account--accompanied by photographs, diagrams, and maps--of how the Tiger tank operated, how it was armed, and where it succeeded brilliantly, as well as where it failed miserably. His book fills a fascinating niche in the history of military technology, and of the impact of technology on history itself.

Tigers in Combat Wolfgang Schneider,2020-09-01 • Hundreds of photos--many of them rare--of Tiger tanks and their crews • Color illustrations by Jean Restayn focus on markings, camouflage, and insignia • Inventories and timelines for each unit In this follow-up to *Tigers in Combat I* (0-8117-3171-5), Wolfgang Schneider turns his attention to the Tiger tanks of the Waffen-SS and the Wehrmacht's named units, such as the Großdeutschland Division, Company Hummel, and Tiger Group Meyer. Based on combat diaries, the text tells the history of each unit, but most of the book is devoted to photos of the tanks and the men who manned them. It offers as unique and comprehensive a look at these lethal machines as is possible decades after World War II.

Germany's Tiger Tanks Thomas L. Jentz,Hilary L. Doyle,2000 This first volume, of a three-volume set, covers the history, development and production history of the Tiger tank variants from the idea's conception to the end of Tiger I production. This includes details on the development series known as the D.W., VK 30.01(H), VK 30.01(P), VK 36.01(H), VK 45.01(P) as well as the Tiger I. All of this illustrated with scale drawings by Hilary L. Doyle, combined with drawings, sketches, and photographs depicting external modifications as well as internal views. Over thirty years of intensive research went into finding the original documents needed to create this history of the development, characteristics, and tactical capabilities of the Tiger. An exhaustive search was made for surviving records of the design/assembly firms (including Krupp, Henschel, Porsche, and Wegmann), the Heereswaffenamt, the Generalinspekteur der Panzertruppen, the D656 series of manuals on the Tiger, and the war diaries with their supporting reports from German army units. This is supplemented by the authors' collecting hundreds of photos and climbing over, under, around, and through nearly every surviving Tiger I. AUTHOR:

British Battle Tanks David Fletcher,Steven J. Zaloga,2018-08-23 The idea of British soldiers using American tanks was not viewed with a great deal of enthusiasm by the British Army. They perceived American tanks as being crudely made, mechanically unsophisticated and impossible to fight in. However, once British crews got used to them and learned to cope with some of their difficulties, such as limited fuel capacity and unfamiliar fighting techniques, they started to see them in a far more positive light, in particular their innate reliability and simplicity of maintenance. This book, the last in a three-part series on British Battle Tanks by armour expert David Fletcher, concentrates on World War II and studies American tanks in British service, some of which were modified in ways peculiar to the British. It shows how the number of these tanks increased to the point that they virtually dominated, as well describing some types, such as the T14 and M26 Pershing, which were supplied but never used in British service.

King Tiger vs IS-2 David R. Higgins,2011-09-20 This book examines the technology and strategy that defined the

outcome of the battles between the King Tiger and the IS-2. The Soviets had been quick to develop tanks that could fight the Tiger on an equal footing, but these were developed as part of a completely different strategy than that employed by the Germans. The King Tiger was a modern marvel, and remained unmatched in one-on-one combat. Technologically superior, with greater firepower and better armour than the Soviet IS-2, the King Tiger was a formidable opponent. However, the IS-2 was lighter, more manoeuvrable and most importantly, far more numerous. With overwhelming numerical superiority the Soviets were able to simply overwhelm their opponents, negating the technical superiority of the King Tiger

Kingtiger Heavy Tank 1942–45 Tom Jentz,Hilary Doyle,1993-01-28 As World War II entered its later stages and Germany was forced increasingly onto the defensive, the need for fast-moving mobile forces lessened and the Wehrmacht required better protected and more powerfully armed tanks. After debacles against the T-34, Hitler and the Panzerwaffe were determined not to be unprepared again. The result of this determination was the production of the heaviest and largest tank to see combat during World War II, the Tiger II or Konigstiger (Kingtiger). This title examines this formidable weapon, covering the problems and controversies surrounding its design and production as well as a detailed listing of every unit that was equipped with the Tiger II.

Panzerjäger vs KV-1 Robert Forczyk,2012-10-20 On the Soviet side, based upon lessons from the Spanish Civil War, the Red Army decided to develop a heavy “breakthrough” tank to smash enemy infantry defenses. This resulted in the KV-1 and KV-2 tanks, introduced in 1939. At the start of Operation Barbarossa, both these tanks were virtually invulnerable to the weapons of the Panzerjäger and demonstrated their ability to overrun German infantry on several occasions. This advantage gave the Red Army a window of opportunity between the fall of 1941 and the spring of 1942 to use their heavy tanks to repel the German invasion in a series of desperate counteroffensives. Yet the window of Soviet advantage was a narrow one and the duel between the Soviet KV heavy tanks and German Panzerjäger had a major impact upon the struggle for the strategic initiative in 1941-42.

Pershing Vs Tiger Steven J. Zaloga,2017-09-19 This fully illustrated study assesses the origins, development, and combat record of Nazi Germany's legendary Tiger I and the US M26 Pershing during the final battles of World War II in Europe.

Okh Toy Factory Michael Winninger,2013 Behind the camouflage name , ,OKH Toy Factory plans to build a new tank factory in Austria were hidden. Most secret were all plans to build the tank works and to run the production. By building this wide spread factory, the small village of St. Valentin was rapidly developed to a most important armament place in the Third Reich. Although hindered by war restrictions the tank factory was growing from 1941 - 1945 to become biggest manufacturer of Panzerkampfwagen IV. The author, Michael Winninger, used original documents of the former Nibelungenwerk GmbH and official authorities as well as photographs for his deep research. He lives in closest distance to the former Nibelungenwerk and was researching the topic for years. This book is the standard publication on the most important German tank manufacturing company of World War II.
