Airpower in Small Wars James S. Corum, Wray R. Johnson, 2003 The use of airpower in wartime calls to mind the massive bombings of World War II, but airplanes have long been instrumental in small wars as well. Ever since its use by the French to put down rebellious Moroccan tribes in 1913, airpower has been employed to fight in limited but often lengthy small conflicts around the globe. This is the first comprehensive history of airpower in small wars—conflicts pitting states against non-state groups such as insurgents, bandits, factions, and terrorists—tracing it from the early years of the twentieth century to the present day. It examines dozens of conflicts with strikingly different scenarios: the Greek Civil War, the Philippine Anti-Huk campaign, French and British colonial wars, the war in South Vietnam before the American escalation, counterinsurgency in southern Africa, Latin American counterinsurgency operations, and counterinsurgency and counterterrorist campaigns in the Middle East over the last four decades. For each war, the authors describe the strategies employed on both sides of the conflict, the air forces engaged, and the specific airpower tactics employed. They discuss the ground campaigns and provide the political background necessary to understand the air campaigns, and in each case they judge the utility of airpower in its broadest sense. In their historic sweep, they show how forms of airpower evolved from planes to police helicopters, aircraft of the civilian air reserve, and today's unmanned aircraft. They also disclose how small wars after World War II required new strategies, operational solutions, and tactics. By taking

this broad view of small-war airpower, the authors are able to make assessments about the most effective and least effective means of employing airpower. They offer specific conclusions ranging from the importance of comprehensive strategy to the need for the United States and its allies to expand small-wars training programs. *Airpower in Small Wars* will be invaluable for educating military professionals and policy makers in the subject as well as for providing a useful framework for developing more effective doctrine for employing airpower in the conflicts we are most likely to see in the twenty-first century.

Patton's Air Force David N. Spires, 2014-06-10 From the time the Third Army became operational on August 1, 1944, until the guns fell silent on May 8, 1945, Lt. Gen. George S. Patton's troops covered more ground and took more enemy prisoners than any other Allied army in northwest Europe. Brig. Gen. Otto P. Weyland's XIX Tactical Air Command (TAC) provided air support every step of the way. Their combined success is something of an anomaly; air-ground relationships are notoriously confrontational and plagued with inter-service competition. How did Patton and Weyland work together to achieve such astounding success? Drawing on exclusive access to official records, David N. Spires finds that this success was due to four key developments: the maturation of tactical aviation doctrine, effective organizational procedures, a technical revolution in equipment, and, above all, the presence of pragmatic men of goodwill who made the system work. He focuses on the highly effective personal relationship between Patton and Weyland -- men who respected, trusted, and fully relied on each other and their respective subordinates. This collaboration extended all the way down the chain of command: Patton's ground

troops and Weyland's airmen trained together in England, and so by the time they entered combat, they operated together as a single unit. Contrary to conventional wisdom, air-ground relationships in the field can be cooperative rather than confrontational. Today's air and ground officers can continue to benefit from the amazing success of the Third Army and the XIX TAC.

Popski's Private Army Vladimir Peniakoff, 2019-04-23 In October 1942, with the sanction of the army, Vladimir Peniakoff (nicknamed Popski) formed his own elite fighting force. By befriending and enlisting desert Arabs, he was able to penetrate deep into German territory without being detected - over the next year, 'Popski's Private Army' carried out a series of raids behind the German lines that were truly spectacular. A bestseller when it was first published in 1950, POPSKI'S PRIVATE ARMY is a classic account of the war in the desert, and later in Italy, as seen through the eyes of a maverick soldier, hailed as the Second World War's answer to T.E. Lawrence.

Air Power for Patton's Army David N. Spires, 2002 Presents a case study of one air-ground team's experience with the theory and practice of tactical air power employed during the climactic World War 2 campaigns against the forces of Nazi Germany.

Inside the Danger Zone Harold Lee Wise, 2007 In May 1987, an Iraqi plane fired two missiles into USS Stark, a lone U.S. Navy frigate on patrol in the Gulf. The missiles severely damaged the ship and killed thirty-seven sailors. This deadly attack, which Iraq

claimed was accidental, brought heightened attention to the Persian Gulf and heralded the beginning of a new era in U.S. Middle Eastern policy. From then until the end of the Iran-Iraq War, American forces carried out an unprecedented series of military operations in the Gulf. A planned tanker protection mission evolved into a naval quasi-war with Iran and culminated in the largest sea-air battle since World War II. Inside the Danger Zone is a history of U.S. military involvement in the Persian Gulf in 1987 and 1988—a time of burning ships, air strikes, and secret missions—the prelude to the Iraqi invasion of Kuwait, Desert Storm, and the most recent invasion of Iraq.

Thunder Run David Zucchino, 2007-12-01 “A Pulitzer Prize-winning reporter provides a brilliant account of the harrowing drive into Baghdad by an American armor brigade.” —Seattle Post-Intelligencer Based on reporting that was a finalist for the Pulitzer Prize, *Thunder Run* chronicles one of the boldest gambles in modern military history: the surprise assault on Baghdad by the Spartan Brigade, the Second Brigade of the Third Infantry Division (Mechanized). Three battalions and fewer than a thousand men launched a violent thrust of tanks and Bradley Fighting Vehicles into the heart of a city of five

million people—and in three days of bloody combat ended the Iraqi war. More than just a rendering of a single battle, *Thunder Run* candidly recounts how soldiers respond under fire and stress and how human frailties are magnified in a war zone. The product of over a hundred interviews with commanders and men from the Second Brigade, it is a riveting firsthand account of how a single armored brigade was able to capture an Arab capital defended by one of the world's largest armies. "The best account of combat since *Black Hawk Down*." —*Men's Journal*

Armored Cav Tom Clancy, 1994-11-01 A penetrating look inside an armored cavalry regiment -- the technology, the strategies, and the people . . . profiled by Tom Clancy. His first non-fiction book, *Submarine*, captured the reality of life aboard a nuclear warship. Now, the #1 bestselling author of *Clear and Present Danger* and *Without Remorse* portrays today's military as only army personnel can know it. With the same compelling, you-are-there immediacy of his acclaimed fiction, Tom Clancy provides detailed descriptions of tanks, helicopters, artillery, and more -- the brilliant technology behind the U. S. Army. He captures military life -- from the drama of combat to the daily routine -- with total accuracy, and reveals the roles and missions that have in recent years distinguished our fighting forces. *Armored Cav* includes: Descriptions of the M1A2 Main Battle Tank, the AH-64A Apache Attack Helicopter, and more An interview with General Frederick Franks Strategies behind the Desert Storm account Exclusive photograph, illustrations and diagrams PLUS: From West Point cadet to Desert Storm commander . . . an interview with a combat cavalry officer on the rise.

A Lonely Kind of War Marshall Harrison, 2010-12-15 From retired Air Force pilot

Marshall Harrison comes a remarkable memoir of aerial warfare in Vietnam. In his third combat tour, Harrison found himself “converted” from the high performance world of jets to the awkward-looking OV-10 Bronco and assigned as a FAC — forward air controller. A captivating tale of valor, brotherhood, and patriotism unravels in the pages of *A Lonely Kind of War, Forward Air Controller, Vietnam*, a posthumous release by this published author through Xlibris. Harrison is a born story teller. There is excitement, suspense, and humor in this account of the life of a FAC. They were a small group of dedicated pilots flying lightly armed prop-driven aircrafts in South Vietnam. Considered to be the eyes and ears of the attack aircraft, their job was to fly low and slow, find, fix, and direct airstrikes against an elusive enemy concealed by the heavy rainforest and jungles, an area the FACs referred to as “the Green Square”. The flying scenes are riveting: learning to fly the maneuverable Bronco, clearing in the “fast-movers” to drop massive 750-lb bombs without causing injury to the “friendlies”, and conducting covert operation into Cambodia---“over the fence with the mad men in the green beans”. On one of these secret missions, he is shot down and spends a harrowing night in the jungle. FACs lived with the troops in the field and flew from unimproved airstrips; they virtually controlled the aerial battlefields of South Vietnam. Their losses were staggering and they usually died alone.
