Basics of Geomatics Mario A. Gomarasca, 2009-09-18 Geomatics is a neologism, the use of which is becoming increasingly widespread, even if it is not still universally accepted. It includes several disciplines and techniques for the study of the Earth's surface and its environments, and computer science plays a decisive role. A more meaningful and appropriate expression is Geo-spatial Information or GeoInformation. Geo-spatial Information embeds topography in its more modern forms (measurements with electronic instrumentation, sophisticated techniques of data analysis and network compensation, global satellite positioning techniques, laser scanning, etc.), analytical and digital photogrammetry, satellite and airborne remote sensing, numerical cartography, geographical information systems, decision support systems, WebGIS, etc. These specialized fields are intimately interrelated in terms of both the basic science and the results pursued: rigid separation does not allow us to discover several common aspects and the fundamental importance assumed in a search for solutions in the complex survey context. The objective pursued by Mario A. Gomarasca, one that is only apparently modest, is to publish an integrated text on the surveying theme, containing simple and comprehensible concepts relevant to experts in Geo-spatial Information and/or especially in one of the disciplines that compose it. At the same time, the book is rigorous and synthetic, describing with precision the main instruments and methods connected to the multiple techniques available today.

What You See Is What You Hear Dario Martinelli, 2020-01-01 *What You See Is What You Hear* develops a unique model of analysis that helps students and advanced scholars alike to look at audiovisual texts from a fresh perspective. Adopting an engaging writing style, the author draws an accessible picture of the field, offering several analytical tools, historical background, and numerous case studies. Divided into five main sections, the monograph covers problems of definitions, history, and most of all analysis. The first part raises the main problems related to audiovisuality, including taxonomical and historical questions. The second part provides the bases for the understanding of audiovisual creative communication as a whole, introducing a novel theoretical model for its analysis. The next three parts focus on the model in all its constituents and with plenty of case studies taken from the field of cinema, TV, music videos, advertising and other forms of audiovisuality. Methodologically, the book is informed by different paradigms of film and media studies, multimodality studies, structuralism, narratology, "auteur theory" in the broad sense, communication studies, semiotics, and the so-called "Humanities." *What You See Is What You Hear* enables readers to better understand how to analyze the structure and content of diverse audiovisual texts, to discuss their

different idioms, and to approach them with curiosity and critical spirit.

Raising Red Flags N.R. Jenzen-Jones,Jonathan Ferguson,2014-11-18 This report examines the significant range of arms and munitions carried and employed throughout the conflict by armed individuals on all sides. It also examines, somewhat less extensively, the range of armoured vehicles and aircraft observed in the conflict. This report examines over 100 distinct weapons systems, over 60 different types of munitions, and over 70 different models of armoured fighting vehicles, as well as miscellaneous associated materiel, in the context of the ongoing conflict in Ukraine. Particular attention is paid to items which may indicate flows of arms and munitions into and within the affected areas of Ukraine. Beginning with an assessment of the arms and munitions employed during the initial unrest in Kiev, in February 2012, the report documents relevant materiel up until the time of publication

Is Journalism Worth Dying For? Anna Politkovskaya,2011-03-16 A collection of final dispatches by the famed journalist, including the first translation of the work that may have led to her murder Anna Politkovskaya won international fame for her courageous reporting. *Is Journalism Worth Dying For?* is

a long-awaited collection of her final writing. Beginning with a brief introduction by the author about her pariah status, the book contains essays that characterize the self-effacing Politkovskaya more fully than she allowed in her other books. From deeply personal statements about the nature of journalism, to horrendous reports from Chechnya, to sensitive pieces of memoir, to, finally, the first translation of the series of investigative reports that Politkovskaya was working on at the time of her murder—pieces many believe led to her assassination. Elsewhere, there are illuminating accounts of encounters with leaders including Lionel Jospin, Tony Blair, George W. Bush, and such exiled figures as Boris Berezovsky, Akhmed Zakaev, Vladimir Bukovsky. Additional sections collect Politkovskaya's non-political writing, revealing her delightful wit, deep humanity, and willingness to engage with the unfamiliar, as well as her deep regrets about the fate of Russia.

Home Rule in America Dale Krane, Platon N. Rigos, Melvin B. Hill, 2001 Home rule powers are essential parts of the American governing process, but they vary widely from state to state. This authoritative reference work examines the powers and functions of municipalities and counties that operate under home rule within each state. For example, the ability of a local municipality to raise taxes, annex land, or impose regulations is determined by their home rule powers from the states. This volume provides a reliable reference work for researchers and students - a single source that readers can trust for information about: The actions that local governments can - and cannot - pursue States where power is centralized at the capital and where it is not How home rule varies within each state by governmental function Trends in important issues such as taxes, land annexation, and citizen access. The editors organized the book in three parts: an overview of American home rule, including its history; a state-by-state description of home rule authority; and a comparative appendix that allows readers a quick reference source of powers by state. A scholar or governmental expert was selected in each state to prepare the state descriptions. Each chapter follows the same outline of content that allows easy comparison between states. In an era of power and responsibilities devolving from the national government to states and localities, the use of home rule powers has become increasingly important to the health of American government and federalism. Researchers and interested citizens will benefit from this comprehensive reference. Home Rule in America was directed by Dale Krane of the

department of public administration, University of Nebraska, Omaha; Platon N. Rigos, department of government and international affairs, University of South Florida; and Melvin Hill, the Vinson Institute of Government, University of Georgia.
