Ngaio Marsh

Artists in Crime Ngaio Marsh,2012-12-15 A model is murdered in this “first-rate” detective story by the Mystery Writers of America Grand Master (Kirkus Reviews). On a ship traveling back to England, Miss Agatha Troy finds Inspector Roderick Alleyn tedious and dull; he thinks she’s a bohemian cliché. They may be destined for romance, but there’s a murder in the way: No sooner has Alleyn settled in to his mother’s house, eager for a relaxing end to his vacation, than he gets a call that a model has been stabbed at the artists’ community down the road. And the talented Miss Troy is one of the community’s most prominent and outspoken members . . . “The doyenne of traditional mystery writers.” —The New York Times

Russian Motor Vehicles Maurice A. Kelly,2011-04-15 A book concerning Russian Limousines, and the Chinese models that were initially derived from them, has never been attempted before. This book investigates the whole story of why the Soviet Communist Party required such a bourgeois product, and how production was subsequently achieved. Following the orders of Stalin, work on the Limousines commenced during the first Five Year Plan (1927-1933) at the Putilov Works, late the Kirov Zavod, where the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and later the Chinese-derived types made with Russian aid during the late 1950s. Covering all of these models, up to the last one produced in 2003, and featuring full specifications translated from the relevant primary sources in Russian and Chinese literature, this is a meticulous and unique account of a previously neglected subject.

Eye Movements and Vision A. L. Yarbus,2013-11-11

The last Shelby Cobra Chris Theodore, 2021-09-15 Carroll Shelby, legendary driving ace, race team owner, and designer of Shelby Cobra, Daytona, and Mustang GT350 classics is revered by automotive enthusiasts, yet little has been written about the last quarter century of Carroll Shelby's life. During that time Chris Theodore, VP at Chrysler and Ford, developed a close personal friendship with Carroll. The Last Shelby Cobra chronicles the development of the many vehicles they worked on together (Viper, Ford GT, Shelby Cobra Concept, Shelby GR1, Shelby GT500 and others). It is an insider's story about how Shelby came back to the Ford family, and the intrigue behind the five-year journey to get a Shelby badge on a Ford Production Vehicle. The author provides fresh insight and new stories into Shelby's larger-than-life personality, energy, interests and the many unpublished projects Carroll was involved with, up to his passing. Finally, the book describes their unfinished project, the Super Snake II Cobra, and the serendipitous circumstances that allowed to the author to acquire 'Daisy,' the last Shelby Cobra. To his many fans, Carroll Shelby was truly 'the most interesting man in the world.'

Putinomics Albrecht Rothacher, 2021-05-20 This book sheds new light on the political economy of Russia under Putin's rule. The author, a former EU diplomat, presents a historical review of the Russian economy and 60 years of state-communist mismanagement, followed by oligarchic privatization. The book offers profound insights into Putin's rule and the power mechanics of the state-dominated management of the Russian economy. It identifies and assesses the lack of rule of law, together with an arbitrary and often corrupt administration that systematically discourages entrepreneurship and the emergence of an independent middle class. Furthermore, the book discusses Russia's

budgetary policy, its dependence on the export of natural resources, state-owned enterprises and their privileges, and Russia's external trade. This hard-hitting, substantial analysis debunks the myth of Russia's economic might and is a must read for anyone seeking to understand the economic realities of the Eurasian continent, or considering doing business with Russia.

American Wheels, Chinese Roads Michael J. Dunne, 2011-07-20 How could one company—General Motors—meet disaster on one continent and achieve explosive growth on another at the very same time? While General Motors was hurtling towards bankruptcy in 2009, GM's subsidiary in China was setting new sales and profit records. This book reveals how extraordinary people, remarkable decisions and surprising breaks made triumph in China possible for General Motors. It also shows just how vulnerable that winning track record remains. No small part of GM's success in China springs from its management of shifting business and political relationships. In China, the government makes the rules for—and competes in—the auto industry. GM's business partner, the City of Shanghai, is both an ally and a competitor. How does such an unnatural relationship work on a day-to-day basis? Where will it go on the future? General Motors also engages in constant battles with other global and Chinese car makers for the hearts of demanding Chinese consumers. Dunne gives us rare glimpses into the mindsets and behavior of this new moneyed set, the world's newest class of wealthy consumers. China is already the number one car market in the world. During the next ten years, China will export millions of cars and trucks globally, including to the United States. American Wheels, Chinese Roads presents readers with fascinating illustrations of what to expect when Chinese cars, companies, and business

people arrive on our shores.

Circle of Treason Sandra V Grimes, Estate of Jeanne Vertefeuille, 2013-11-15 While there have been other books about Aldrich Ames, *Circle of Treason* is the first account written by CIA agents who were key members of the CIA team that conducted the intense “Ames Mole Hunt.” Sandra Grimes and Jeanne Vertefeuille were two of the five principals of the CIA team tasked with hunting one of their own and were directly responsible for identifying Ames as the mole, leading to his arrest and conviction. One of the most destructive traitors in American history, CIA officer Aldrich Ames provided information to the Soviet Union that contributed to the deaths of at least ten Soviet intelligence officers who spied for the United States. In this book, the two CIA officers directly responsible for tracking down Ames chronicle their involvement in the hunt for a mole. Considering it their personal mission, Grimes and Vertefeuille dedicated themselves to identifying the traitor responsible for the execution or imprisonment of the Soviet agents with whom they worked. Their efforts eventually led them to a long-time acquaintance and coworker in the CIA’s Soviet-East European division and Counterintelligence Center, Aldrich Ames. Not only is this the first book to be written by the CIA principals involved, but it is also the first to provide details of the operational contact with the agents Ames betrayed. The book covers the political aftermath of Ames’s arrest, including the Congressional wrath for not identifying him sooner, the FBI/CIA debriefings following Ames’s plea bargain, and a retrospective of Ames the person and Ames the spy. It is also the compelling story of two female agents, who overcame gender barriers and succeeded in bringing Ames to justice in a historically male-oriented organization. Now retired from the CIA, Grimes and Vertefeuille are finally

able to tell this inside story of the CIA's most notorious traitor and the men he betrayed.

Towards a Balkan Gas Hub Aleksandar Kovačević,2017

The Strongman Angus Roxburgh,2011-12-15 Russia under Vladimir Putin has proved a prickly partner for the West, a far cry from the democratic ally many hoped for when the Soviet Union collapsed. Abroad, he has used Russia's energy might as a foreign policy weapon, while at home he has cracked down on opponents, adamant that only he has the right vision for his country's future. Former BBC Moscow correspondent Angus Roxburgh charts the dramatic fight for Russia's future under Vladimir Putin - how the former KGB man changed from reformer to autocrat, how he sought the West's respect but earned its fear, how he cracked down on his rivals at home and burnished a flamboyant personality cult, one day saving snow leopards or horse-back riding bare-chested, the next tongue-lashing Western audiences. Drawing on dozens of exclusive interviews in Russia, where he worked for a time as a Kremlin insider advising Putin on press relations, as well as in the US and Europe, Roxburgh also argues that the West threw away chances to bring Russia in from the cold, by failing to understand its fears and aspirations following the collapse of communism.

Feline Clinical Parasitology Dwight D. Bowman,Charles M. Hendrix,David S.

Lindsay,Stephen C. Barr,2008-02-08 Although there are books available dealing with canine parasitology, there is at present no book detailing parasites that offers clinical information specific to felines. Cats differ significantly from dogs in their parasitic infections and infestations. Although dogs and cats do share a few parasites, the vast majority of the parasites of these pets are specific to either cats or dogs, not to both. This must-have

reference offers an in-depth examination of feline parasites. Topics covered include parasite identification, history, geographic distribution, pathogenesis, epidemiology, zoonosis, diagnosis, treatment, control, and prevention. Because of the immense worldwide popularity of cats and due to the amount of travel undertaken by cats and their owners, the authors have produced a book that is international in scope. Consequently, this exhaustive reference has strong appeal to practitioners and veterinary parasitologists in North America and around the world.

Motion Performance: Tales of a Muscle Car Builder Martyn L. Schorr,

A Difficult Neighbourhood John Besemeres, 2016-10-14 Through a series of essays on key events in recent years in Russia, the western ex-republics of the USSR and the countries of the one-time Warsaw Pact, John Besemeres seeks to illuminate the domestic politics of the most important states, as well as Moscow's relations with all of them. At the outset, he takes some backward glances at the violent suppression of national life in the 'bloodlands' of Europe during World War II by the Stalinist and Nazi regimes, which helps to explain much about the region's dynamics since. His concern throughout is that a large area of Europe with a combined population well in excess of Russia's could again be consigned by the West to Moscow's care, not this time by more and less malign forms of collusion, but by distracted negligence or incomprehension. 'This is a wonderful collection of essays from a leading Eastern Europe specialist. John Besemeres brings a lifetime of experience, profound insights, and an incisive style to subjects ranging from wartime and post-war Poland through contemporary Ukraine to Putin's Russia. At a time when doublespeak has become the new normal, his refreshing honesty has never been in greater

need.’ — Bobo Lo This publication was awarded a Centre for European Studies Publication Prize in 2015. The prize covers the cost of professional copyediting.

Energy Security Challenges for the 21st Century Gal Luft, Anne Korin, 2009-08-10
The impact of energy on global security and economy is clear and profound, and this is why in recent years energy security has become a source of concern to most countries. However, energy security means different things to different countries based on their geographic location, their endowment of resources their strategic and economic conditions. In this book, Gal Luft and Anne Korin with the help of twenty leading experts provide an overview of the world's energy system and its vulnerabilities that underlay growing concern over energy security. It hosts a debate about the feasibility of resource conflicts and covers issues such as the threat of terrorism to the global energy system, maritime security, the role of multinationals and non-state actors in energy security, the pathways to energy security through diversification of sources and the development of alternative energy sources. It delves into the various approaches selected producers, consumers and transit states have toward energy security and examines the domestic and foreign policy tradeoffs required to ensure safe and affordable energy supply. The explains the various pathways to energy security and the tradeoffs among them and demonstrates how all these factors can be integrated in a larger foreign and domestic policy framework. It also explores the future of nuclear power, the complex relations between energy security and environmental concerns and the role for decentralized energy as a way to enhance energy security.

Kill Move Paradise James Ijames, 2019-08-12 Four black men find themselves stuck in a waiting room for the afterlife. As they attempt to make sense of their new paradise, Isa,

Daz, Grif, and Tiny are forced to confront the reality of their past, and how they arrived in this unearthly place. Inspired by the ever-growing list of slain black men and women, KILL MOVE PARADISE illustrates the potential for collective transformation and radical acts of joy.

Respect, 2019

Great Powers and Geopolitics Aharon Klieman, 2015-04-02 This book presents the theoretical-historical-comparative political framework needed to fully grasp the truly dynamic nature of 21st century global affairs. The author provides a realistic assessment of the shift from U.S. predominance to a new mix of counterbalancing rival middle-tier and assertive regional powers, while highlighting those geopolitical zones of contention most critical for future international stability. The book will appeal to scholars and policy makers interested in understanding the contours of the emerging world order, and in identifying its principal shapers and leading political actors.

Russian-English Dictionary of Idioms, Revised Edition Sophia

Lubensky, 2013-01-01 This is the most innovative, comprehensive, and scholarly bilingual dictionary of Russian idioms available today. It includes close to 14,000 idioms, set expressions, and sayings found in contemporary colloquial Russian and in literature from the nineteenth century to the present. The Russian idioms are provided with many English equivalents to render idioms in various contexts. Illustrative examples are cited to show how the idioms are used in context. Each entry also contains a grammatical description of the idiom, a definition—an innovative feature for a bilingual dictionary—and stylistic and usage information. A most notable part of the work is the alphanumeric index that makes finding the right expression very easy.

The New Northern Dimension of the European Neighbourhood Pami Aalto, Helge

Blakkisrud, Hanna Smith, 2008 In the contemporary policy debate on the EU's neighborhood,

grand designs are transforming into more pragmatic considerations. This book examines regional cooperation among the countries of northern Europe, emphasizing the pitfalls and successes of engaging Russia. Drawing from the experiences of northern partnerships, the authors assess prospects for collaborating on energy, transportation, the environment, and public health. They conclude that practical regional cooperation with Russia can prove highly relevant not only for developing the EU's northern policy but also for working with Russia in general.

The Common Hamster (Cricetus Cricetus) Eva Millesi, Hans Winkler, Renate Hengsberger, 2008 The Common Hamster is a fascinating species that differs from other hibernating small mammals in several aspects. Females have up to three litters per season and under favourable conditions both males and females are sexually mature in their first year. The ability to cache food changes the need for fattening prior to hibernation and consequently can alter the pattern of reproductive activity. The Common Hamster has lived in agricultural areas in close association with humans for centuries. During the last few decades, the loss of suitable habitats and modern agriculture technology have brought the species close to extinction in many areas. It has thus been listed as a highly threatened species in several European countries. Preventative measures require detailed knowledge about the biology of the species and a hamster-friendly management scheme in agricultural areas. In this volume, contributions made at the 13th Meeting of the International Hamster Workgroup have been summarized. Studies investigating burrow architecture, population dynamics, predation pressure, life span and reproductive activity underline the environmental flexibility of the species. The results of conservation programs are presented

and discussed. Reports of breeding regimes with selected light-dark-cycles that can be used to optimize reproductive output and may benefit reintroduction projects have also been included. Generally the presented results should help broaden our knowledge about the Common Hamster and promote international networks to plan, implement, coordinate and evaluate management programs.
