Performing the Gospels in Byzantium Roland Betancourt, 2021-05-13 Tracing the Gospel text from script to illustration to recitation, this study looks at how illuminated manuscripts operated within ritual and architecture. Focusing on a group of richly illuminated lectionaries from the late eleventh century, the book articulates how the process of textual recitation produced marginalia and miniatures that reflected and subverted the manner in which the Gospel was read and simultaneously imagined by readers and listeners alike. This unique approach to manuscript illumination points to images that slowly unfolded in the mind of its listeners as they imagined the text being recited, as meaning carefully changed and built as the text proceeded. By examining this process within specific acoustic architectural spaces and the sonic conditions of medieval chant, the volume brings together the concerns of sound studies, liturgical studies, and art history to demonstrate how images, texts, and recitations played with the environment of the Middle Byzantine church.

Romanticism and Time Sophie Laniel-Musitelli, Céline Sabiron, 2021-03-10 'Eternity is in love with the productions of time'. This original edited volume takes William Blake's aphorism as a basis to explore how British Romantic literature creates its own sense of time. It considers Romantic poetry as embedded in and reflecting on the march of time, regarding it not merely as a reaction to the course of events between the late-eighteenth and mid-nineteenth centuries, but also as a form of creative engagement with history in the making. The authors offer a comprehensive overview of the question of time from a literary perspective, applying a diverse range of critical approaches to Romantic authors from William Blake and Percy Shelley to John Clare and Samuel Rogers. Close readings uncover fresh insights into these authors and their works, including *Frankenstein*, the most familiar of Romantic texts. Revising current thinking about periodisation, the authors explore how the Romantic poetics of time bears witness to the ruptures and dislocations at work within chronological time. They consider an array of topics, such as ecological time, futurity, operatic time, or the a-temporality of Venice. As well as surveying the Romantic canon's evolution over time, these essays approach it as a phenomenon unfolding across national borders. Romantic authors are compared with American or European counterparts including Beethoven, Irving, Nietzsche and Beckett. *Romanticism and Time* will be of great value to literary scholars and students working in Romantic Studies. It will be of further interest to philosophers and historians working on the connections between philosophy, history and literature during the nineteenth century.

Stardust Dads Josephine C. George, David R. George, 2008-10-17 The e-mail Danny and Allison read on their new computer in 1996 looks no different from the millions of others received by Web users around the world, with one glaring exception--it was sent by their dads who died during the 1970s. While residing in the afterworld at an amenity-laden paradise called Midway Manor, guitar-strumming Mickey Parks and piano-playing Lloyd Wallace monitor and manipulate the lives of their adult children on earth from the mid-'70s through the 1990s. Tampering with the facility's sophisticated computer, the dads thrust Mickey's daughter Allison and Lloyd's son Danny into a passionate but sometimes stormy relationship--a relationship steeped in Danny's heavy drinking and entangled in the often-zany world of men's adventure magazine publishing. After carefully implementing a plan to send their son and daughter a gift of knowledge that could enrich their lives forever, the dads' brief contact is cut short. They are banished to another destination in the afterworld, but not before they impart indisputable proof of life after death--and unwittingly put Danny's and Allison's earthbound lives on the line.

Paradise Screwed Carl Hiaasen, 2009-09-13 Along with *Kick Ass*, this is one of the best collections of occasional journalism published in recent years.--Booklist (starred review)

Deleuze/Guattari & Ecology Bernd Herzogenrath, 2009 What does ecology mean if this concept cannot be grounded anymore in an essentialist and clear-cut separation of

nature and culture, nature and man, human and non-human, as Deleuze and Guattari - in both their individual and collective works - suggest? [M]an and nature are not like two opposite terms confronting each other - not even in the sense of bipolar opposites within a relationship of causation, ideation, or expression (cause and effect, subject and object, etc); rather they are one and the same essential reality, the producer-product (Anti-Oedipus 4-5). Deleuze/Guattari's generalized ecology turns Ecology into a complex transdisciplinary project linking philosophy, art, sociology, literature, politics, music, history, the hard and soft sciences. Deleuze/Guattari offer a perspective on ecology as a comprehensive natural ontology of complex material systems, without falling into the trap of the Cartesian dualism of nature and culture that is still operative in much of the mainstream of ecological/ecocritical approaches.--BOOK JACKET.

Geomechanics and Geology J.P. Turner,D. Healy,R.R. Hillis,M. Welch,2017-09-19 Geomechanics investigates the origin, magnitude and deformational consequences of stresses in the crust. In recent years awareness of geomechanical processes has been heightened by societal debates on fracking, human-induced seismicity, natural geohazards and safety issues with respect to petroleum exploration drilling, carbon sequestration and radioactive waste disposal. This volume explores the common ground linking geomechanics with inter alia economic and petroleum geology, structural geology, petrophysics, seismology, geotechnics, reservoir engineering and production technology. Geomechanics is a rapidly developing field that brings together a broad range of subsurface professionals seeking to use their expertise to solve current challenges in applied and fundamental geoscience. A rich diversity of case studies herein showcase applications of geomechanics to hydrocarbon exploration and field development, natural and artificial geohazards, reservoir stimulation, contemporary tectonics and subsurface fluid flow. These papers provide a representative snapshot of the exciting state of geomechanics and establish it firmly as a flourishing subdiscipline of geology that merits broadest exposure across the academic and corporate geosciences.

Britain and the Weimar Republic Colin Storer,2020-06-25 Between the two world wars, Germany managed - despite all the political upheavals it was experiencing - to attract extremely large numbers of British travellers and tourists. During the Weimar period in particular, Germany attracted visitors from virtually every section of British society. In this book, Colin Storer moves beyond the traditional scholarly focus on figures such as Christopher Isherwood and John Maynard Keynes to provide the first broad comparative study of British intellectual attitudes towards Weimar Germany. Based on original research and using striking examples from intellectual life and literature it highlights the diversity of British attitudes, challenges received opinions on areas such as the 'inevitable collapse' of the Republic, and seeks to establish why Weimar Germany was so appealing to such a variety of individuals.

Plant Horror Dawn Keetley, Angela Tenga, 2016-12-21 This collection explores artistic representations of vegetal life that imperil human life, voicing anxieties about our relationship to other life forms with which we share the earth. From medieval manuscript illustrations to modern works of science fiction and horror, plants that manifest monstrous agency defy human control, challenge anthropocentric perception, and exact a violent vengeance for our blind and exploitative practices. Plant Horror explores how depictions of monster plants reveal concerns about the viability of our prevailing belief systems and dominant ideologies— as well as a deep-seated fear about human vulnerability in an era of deepening ecological crisis. Films discussed include The Day of the Triffids, Invasion of the Body Snatchers, The Wicker Man, Swamp Thing, and The Happening.

How Does Intuition Work IntroBooks Team, Intuition is a phenomenon that offers people the ability to know something instinctively without adopting analytical thought, striking a balance between human mind's conscious and unconscious components, as well as between intuition and intent. Human disconcert is founded on centuries of social bias with the notion of focusing on intuition. In the age of big data, it might seem like a subterfuge or inadequate process to rely on intuition what others consider spirit, instinct, a sixth sense, or a gut feeling. But according to a study of high-level executives, most business pioneers take advantage of their experiences and feelings when coping with challenges. And despite appearances, intuition is not an unconventional term specifically reserved for the realm of self-elating emotion. In reality, there is a neurological foundation for it. When one understands intuition oriented science and how ideas can be affected, he can decide more readily when it is better to go with the gut feeling and when it is better to look at available data.

Key Concepts in Public Archaeology Gabriel Moshenska, 2017-09-28 This book provides a broad overview of the key concepts in public archaeology, a research field that examines the relationship between archaeology and the public, in both theoretical and practical terms. While based on the long-standing programme of undergraduate and graduate teaching in public archaeology at UCL's renowned Institute of Archaeology, the book also takes into account the growth of scholarship from around the world and seeks to clarify what exactly 'public archaeology' is by promoting an inclusive, socially and politically engaged vision of the discipline. Written for students and practitioners, the individual chapters provide textbook-level introductions to the themes, theories and controversies that connect archaeology to wider society, from the trade in illicit antiquities to the use of digital media in public engagement, and point readers to the most relevant case studies and learning resources to aid their further study. This book was produced as part of JISC's Institution as e-Textbook Publisher project. Undrafted Nick Kypreos, 2020-10-20 True stories and hard-won lessons about a life of hockey, from a Stanley Cup champion and top analyst. As a child growing up in Toronto, Nick Kypreos lived for hockey and dreamed of following in his idols' footsteps to play in the NHL. Hockey was an important part of the Kypreos household. It was largely through the game that his immigrant Greek parents acclimatized to their new lives in Canada, and from a young age "Kyper" proved he was more than good enough to move through the ranks. But he was never a top prospect—he didn't even attend the NHL draft when he became eligible. And yet, through dedication and constant improvement, he made it to the show. Kypreos built a career on his tireless work ethic and made a name for himself for always having a positive influence on team morale. A medium-weight fighter, he squared off with the league's toughest players, including Chris Simon, Joey Kocur, Tony Twist, and Scott Stevens—anything to give his team an edge. Ultimately, he was brought to the New York Rangers to help them win the Stanley Cup in 1994—their first in fifty-four years—with the legendary Mark Messier. And then he got to live his other dream: playing for his hometown team, the Toronto Maple Leafs. When a concussion forced him to retire early, it changed his life. But the lessons he'd learned on the ice over eight seasons helped him build a new career as a top hockey analyst and personality for Sportsnet. For twenty seasons he provided unique insight on the evolving game, and a player's perspective on the biggest discussions of the day. Revealing, fun, and brutally honest, Undrafted shows the challenges of being a pro player. It's a story of the resilience it takes to prove yourself every night, and how the right attitude can lead to the greatest success, not only in the arena, but in life.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first

English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Moon-face and Other Stories Jack London,1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, *The Call of the Wild* (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including *The Sea-Wolf* (1904), *White Fang* (1906), *South Sea Tales* (1911), and *Jerry of the South Seas* (1917). One of London's most interesting novels is the semi-autobiographical *Martin Eden* (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.
