**Mahogany in Scale** ,2007 The classic mahogany runabout is a universally popular modeling subject, but many newcomers to the modeling hobby are apprehensive about completing a build. Will they be able to fit the planks perfectly? And how about the glass-smooth clear finish, which tolerates no mistakes in woodwork or polishing? It's really not so hard, just follow the steps outlined here! Model boat buff Patrick Matthews covers the entire process, from choosing a project from one of the many available kits, through building and finishing a mahogany marvel-- even the basics of Radio Control are covered. Additional suggestions are included for simple but effective customizations, as well as a gallery of models from some real masters of the craft-- temptation and encouragement for the modeler to stretch further yet. Patrick Matthews shares his enthusiasm for model boats through contributions to *Ships in Scale* magazine, where he covers Radio Control scale model boats. In his spare time, Patrick is an automotive engineer in Detroit.

*Scar and the Wolf* Plainfield Press,2013-03-14 Scarlet Bone is a zombie girl with one big problem. It's not that she's missing a nose (zombie parts go missing all the time). It's not that she's turning 13 today and her parents just gave her a massive chore to do. It's not even the stray arm she found in the street -- the one that's giving her so much trouble. No, Scarlet's problem is that she's about to end up on the wrong side of a wolf: the inside. Welcome to the strange, yet strangely familiar world of the Plainfield Chronicles. In *The Plainfield Chronicles: Scar and the Wolf*, the series' debut novel, you'll find a story you recognize, but one you've never read before. A girl's parents tell her she needs to take a special package to Grandmother's house, deep in the woods. She puts on her red riding hood and sets out, alone. She encounters a wolf, and reveals to him what she's doing and where she's headed. She gets distracted on her journey and arrives late to Grandma's. Too late. Grandma? Is that you? Something seems amiss. What big ears you have. What big eyes you have. What big teeth you have. *Scar and the Wolf* is the Little Red Riding Hood for our time — one with zombies, music, and lost body parts just trying to find their way home.

*Model-making* David Neat, 2013-12-21 Model-making: Materials and Methods focuses primarily on the wide variety of materials that can be employed to make models; those which have been favoured for a while and those which are relatively new. The book looks at how these materials behave and how to get the best out of them, then illustrates a range of relatively simple methods of building, shaping, modelling, surfacing and painting with them. Useful features of the book include: the different uses of models in various disciplines; the sequence of making; planning and construction, creating surfaces, painting and finishing; methods of casting, modelling and working with metals; step-by-step accounts of the making of specially selected examples; simple techniques without the need for expensive tools or workshop facilities; a 'Directory' of a full range of materials, together with an extensive list of suppliers. This book is intended for students of theatre production, art & architecture, animation and theatre/television set designers where accurate scale models are necessary, and is also of interest to anyone involved with the process of making forms in 3D and the challenge of making small-scale forms in general. Superbly illustrated with 185 colour photographs.

The reader will learn how to blend the track plan itself with structures and scenery in a realistic manner along with a basic understanding of how real railroads work to help them narrow the layout-design focus, leading to a workable plan for the space a modeler has available.
