McMafia Misha Glenny, 2009-01-19 Drugs, weapons, migrant labour, women — these are just a few of the many goods that effortlessly cross national borders in this globalized age, often without the knowledge or permission of the nations concerned. How is this remarkable criminal feat managed? From gun runners in the Ukraine, to money launderers in Dubai, cyber criminals in Brazil, racketeers in Japan, and the booming marijuana industry in western Canada, McMafia builds a breathtaking picture of a secret and bloody business. Internationally celebrated writer Misha Glenny crafts a fascinating, highly readable, and impressively well-researched account of the emergence of organized crime as a globalized phenomenon and shows how its secret and bloody business mirrors both the methods and the rewards of the legitimate world economy. Employing his journalistic talent and his prior experience covering organized crime in Eastern Europe, Glenny reports on his travels around the planet to investigate this worrying and worsening situation. After comprehensively surveying the criminal scene, Glenny ends by considering the future of organized crime. McMafia is an important book that assembles all the pieces of this worldwide puzzle for the first time.

Violence and Colonial Order Martin Thomas, 2012-09-20 This is a pioneering, multi-empire account of the relationship between the politics of imperial repression and the economic structures of European colonies between the two World Wars. Ranging across colonial Africa, Southeast Asia and the Caribbean, Martin Thomas explores the structure of local police forces, their involvement in colonial labour control and the containment of uprisings and dissent. His work sheds new light on broader trends in the direction and intent of colonial state repression. It shows that the management of colonial economies, particularly in crisis conditions, took precedence over individual imperial powers' particular methods of rule in determining the forms and functions of colonial police actions.

The politics of colonial labour thus became central to police work, with the depression years marking a watershed not only in local economic conditions but also in the breakdown of the European colonial order more generally.

This book was the first broad exposé of the social and environmental damage inflicted by the growth of corporate agriculture in California. *Factories in the Field*—together with the work of Dorothea Lange, Paul Taylor, and John Steinbeck—dramatizes the misery of the dust bowl migrants hoping to find work in California agriculture. Reverse Subsidies in Global Monopsony Capitalism Dev Nathan, Shikha Silliman
Bhattacharjee, S. Rahul, Purushottam Kumar, Immanuel Dahagani, Sukhpal Singh, Padmini Swaminathan, 2022-05-26
This book provides a firm analytical base to discussions about injustice and

the unequal distribution of gains from global production in the form of global monopsony capitalism. It utilizes the concept of reverse subsidies as the purchase of gendered labour and environmental services below their costs of production in garment value chains in India and other garment producing countries, such as Bangladesh and Cambodia. Environmental services, such as freshwater for garment manufacture and land for cotton production, are degraded by overuse and untreated waste disposal. The resulting higher profits from the low prices of garments are captured by global brands, using their monopsony position, with few buyers and myriad sellers, in the market. This book links the concept of reverse subsidies with those of injustice, inequality and sustainability in global production.

Can't Stop Won't Stop Jeff Chang, 2007-04-01 *Can't Stop Won't Stop* is a powerful cultural and social history of the end of the American century, and a provocative look into the new world that the hip-hop generation created. Forged in the fires of the Bronx and Kingston, Jamaica, hip-hop became the Esperanto of youth rebellion and a generation-defining movement. In a post-civil rights era defined by deindustrialization and globalization, hip-hop crystallized a multiracial, polycultural generation's worldview, and transformed American politics and culture. But that epic story has never been told with this kind of breadth, insight, and style. Based on original interviews with DJs, b-boys, rappers, graffiti writers, activists, and gang members, with unforgettable portraits of many of hip-hop's forebears, founders, and mavericks, including DJ Kool Herc, Afrika Bambaataa, Chuck D, and Ice Cube, *Can't Stop Won't Stop* chronicles the events, the ideas, the music, and the art that marked the hip-hop generation's rise from the ashes of the 60's into the new millennium.

Darwin Day in America John G. West, 2014-04-22 At the dawn of the last century, leading scientists and politicians giddily predicted that science—especially Darwinian biology—would supply solutions to all the intractable problems of American society, from crime to poverty to sexual

maladjustment. Instead, politics and culture were dehumanized as scientific experts began treating human beings as little more than animals or machines. In criminal justice, these experts denied the existence of free will and proposed replacing punishment with invasive “cures” such as the lobotomy. In welfare, they proposed eliminating the poor by sterilizing those deemed biologically unfit. In business, they urged the selection of workers based on racist theories of human evolution and the development of advertising methods to more effectively manipulate consumer behavior. In sex education, they advocated creating a new sexual morality based on “normal mammalian behavior” without regard to longstanding ethical and religious imperatives. Based on extensive research with primary sources and archival materials, John G. West’s captivating *Darwin Day in America* tells the story of how American public policy has been corrupted by scientific ideology. Marshaling fascinating anecdotes and damning quotations, West’s narrative explores the far-reaching consequences for society when scientists and politicians deny the essential differences between human beings and the rest of nature. It also exposes the disastrous results that ensue when experts claiming to speak for science turn out to be wrong. West concludes with a powerful plea for the restoration of democratic accountability in an age of experts.

Bishop George Bell George Kennedy Allen Bell, Peter Raina, Rudolf Hess, 2009 Bishop George Bell always felt that the Church must endeavour to meet the problems of the modern world. He was thus foremost in applying the precepts of the Christian faith to national and international issues. George Bell very often raised his voice in the House of Lords (of which he was a distinguished member from December 1937 till January 1958) against class and racial hatred, against war, and against totalitarianism, and spoke for the innocent and helpless victims of persecution. Complete texts of all Bell's House of Lords speeches are presented here, published for the first time in one volume. The

issues that Bell tackled are, in essence, still relevant today. This volume also includes unpublished correspondence between George Bell and Rudolf Hess, Hitler's deputy. After the National Socialists came to power in Germany, Bell, as a committed Christian, felt that he had to act in defence of the German Church, which the Nazis were eager to destroy. The Bishop made strenuous efforts to contact people in power in Germany, people who, he knew, took decisions with momentous consequences. Rudolf Hess was one of them.

Labor Rights and Multinational Production Layna Mosley,2010-11-01 Labor Rights and Multinational Production investigates the relationship between workers' rights and multinational production. Mosley argues that some types of multinational production, embodied in directly owned foreign investment, positively affect labor rights. But other types of international production, particularly subcontracting, can engender competitive races to the bottom in labor rights. To test these claims, Mosley presents newly generated measures of collective labor rights, covering a wide range of low- and middle-income nations for the 1985–2002 period. Labor Rights and Multinational

Production suggests that the consequences of economic openness for developing countries are highly dependent on foreign firms' modes of entry and, more generally, on the precise way in which each developing country engages the global economy. The book contributes to academic literature in comparative and international political economy, and to public policy debates regarding the effects of globalization.

The Criminal Child Jean Genet, 2020-01-21 The Criminal Child offers the first English translation of a key early work by Jean Genet. In 1949, in the midst of a national debate about improving the French reform-school system, Radiodiffusion Française commissioned Genet to write about his experience as a juvenile delinquent. He sent back a piece that was a paean to prison instead of the expected horrifying exposé. Revisiting the cruel hazing rituals that had accompanied his incarceration, relishing the special argot spoken behind bars, Genet bitterly denounced any improvement in the condition of young prisoners as a threat to their criminal souls. The radio station chose not to broadcast Genet's views. "The Criminal Child" appears here with a selection of Genet's finest essays, including his celebrated piece on the art of Alberto Giacometti.
