Terry Hunt,Carl Lipo

**Sea Drift** Peter Joseph Capelotti,2001 Heyerdahl's radical thesis of a prehistoric world where ancient mariners traveled between continents on ocean currents electrified the postwar world. His *Kon-Tiki: Across the Pacific by Raft* sold twenty million copies in sixty-five languages..

**Kon Tiki** Thor heyerdahl,1977-06-02

*Kon Tiki* Robyn Watts,2024 This is the amazing story of the journey of the Kon-Tiki, a balsa wood raft which sailed and drifted from South America to the Pacific over 101 days and over 7000km. Thor Heyerdahl believed that the ancient South American people had travelled this route hundreds of years ago and he set out on this daring adventure to try and prove his theory. A great introduction to our Pacific region and also to design and technologies discussions.

**The Kon-Tiki Man** Christopher Ralling,1991

*The Ra Expeditions* Thor Heyerdahl,1993 No further information has been provided for this title.

**The Impossible Voyage of Kon-Tiki** Deborah Kogan Ray,2015-10-13 Combining history with culture, the ocean with exploration, and risk with triumph—this rich offering is the only picture book account of Thor Heyerdahl's world-famous Kon-Tiki expedition, during which he sailed a raft 5,000 miles from the coast of South America to the islands of the South Pacific. Author Deborah Kogan Ray clearly and succinctly sets up how Norwegian anthropologist Heyerdahl became convinced that ancient Peruvians arrived in the South Pacific via raft, why he wanted to re-create the voyage, and how he planned for it. She uses primary-source quotations on each spread to shore up the factual history of the events portrayed in the book. Her illustrations add emotion to this harrowing journey.

**The Bombard Story** Alain Bombard,1986

*Early Man and the Ocean* Thor Heyerdahl,1979 Discusses the ships, navigational systems, achievements, and discoveries of ancient seamen and examines their influence on the spread of culture in the ancient world and on subsequent exploration.

**The Book of Tiki** Sven A. Kirsten,2000 South Sea Dreams around the cocktail bar - on the trail of the forgotten Tiki cult of the Fifties. One of the most bizarre chapters of American Pop Culture awaits rediscovery.

**The Art of Tiki** Sven Kirsten,Otto Von Stroheim,2022-10-22 The Art of Tiki is a passionate study of the Tiki idol as an art form. For the first time, contemporary Tiki art is united and presented equally with what inspired it, original mid-century Polynesian pop. Author Sven Kirsten combines his first-hand experiences in exploring the birth of Tiki style with his intimate knowledge of the Tiki Revival, painting

a vivid, visually arresting portrait of a unique, always new art genre.

**Hokule'a** Ben R. Finney, 1979

*County Fair Portraits* Mikkel Aaland, 2016-04-21 Portraits made in a portable studio that was hauled from county fair to county fair in California and Arizona from 1976 to 1980.

*The Biochar Revolution* Paul Taylor, 2010 Black is the new Green! How to transform agriculture and the environment. A friendly, informative inspiring and break-through reference guide for anyone interested in biochar or concerned about environmental issues.

**Kon-Tiki** Thor Heyerdahl, 2014-11-11 “One of the great adventures of our time.” —Life “Am going to cross Pacific on a wooden raft to support a theory that the South Sea islands were peopled from Peru. Will you come? . . . Reply at once.” That is how six brave and inquisitive men came to seek a dangerous path to test a scientific theory. On a primitive raft made of forty-foot balsa logs and named “Kon-Tiki” in honor of a legendary sun king, Thor Heyerdahl and five companions deliberately risked their lives to show that the ancient Peruvians could have made the 4,300-mile voyage to the Polynesian islands on a similar craft. For three months, the bold young men made their way across the Pacific at the complete mercy of the ocean. They encountered storms that threatened to tear their raft apart, whales large enough to sink them in the blink of an eye, and sharks ready to feast on any man unfortunate enough to fall overboard. In the true spirit of adventure, they held on until finally making landfall on a remote Polynesian island, proving Heyerdahl’s theory possible after all. On every page of this true chronicle—from the actual building of the raft through all the dangerous and comic adventures on the sea, to the spectacular crash landing and the native islanders’ hula dances—each reader will find a wholesome and spellbinding escape from the twenty-first century.

Sea People Christina Thompson, 2019-03-12 A blend of Jared Diamond’s *Guns, Germs, and Steel* and Simon Winchester’s *Pacific*, a thrilling intellectual detective story that looks deep into the past to uncover who first settled the islands of the remote Pacific, where they came from, how they got there, and how we know. For more than a millennium, Polynesians have occupied the remotest islands in the Pacific Ocean, a vast triangle stretching from Hawaii to New Zealand to Easter Island. Until the arrival of European explorers they were the only people to have ever lived there. Both the most closely related and the most widely dispersed people in the world before the era of mass migration, Polynesians can trace their roots to a group of epic voyagers who ventured out into the unknown in one of the greatest adventures in human history. How did the earliest Polynesians find and colonize these far-flung islands? How did a people without writing or metal tools conquer the largest ocean in

the world? This conundrum, which came to be known as the Problem of Polynesian Origins, emerged in the eighteenth century as one of the great geographical mysteries of mankind. For Christina Thompson, this mystery is personal: her Maori husband and their sons descend directly from these ancient navigators. In *Sea People*, Thompson explores the fascinating story of these ancestors, as well as those of the many sailors, linguists, archaeologists, folklorists, biologists, and geographers who have puzzled over this history for three hundred years. A masterful mix of history, geography, anthropology, and the science of navigation, *Sea People* combines the thrill of exploration with the drama of discovery in a vivid tour of one of the most captivating regions in the world. *Sea People* includes an 8-page photo insert, illustrations throughout, and 2 endpaper maps.

**Writing Research Papers** James D. Lester (Jr.), 2015 The definitive research paper guide, *Writing Research Papers* combines a traditional and practical approach to the research process with the latest information on electronic research and presentation. This market-leading text provides students with step-by-step guidance through the research writing process, from selecting and narrowing a topic to formatting the finished document. *Writing Research Papers* backs up its instruction with the most complete array of samples of any writing guide of this nature. The text continues its extremely thorough and accurate coverage of citation styles for a wide variety of disciplines. The fourteenth edition maintains Lester's successful approach while bringing new writing and documentation updates to assist the student researcher in keeping pace with electronic sources.

*Kon-Tiki and I* Erik Hesselberg, 1950 The author relates the voyage of the Kon-Tiki expedition across 4300 miles of ocean in a raft as he experienced and sketched it.

**The Statues that Walked** Terry Hunt, Carl Lipo, 2011-06-21 The monumental statues of Easter Island, both so magisterial and so forlorn, gazing out in their imposing rows over the island's barren landscape, have been the source of great mystery ever since the island was first discovered by Europeans on Easter Sunday 1722. How could the ancient people who inhabited this tiny speck of land, the most remote in the vast expanse of the Pacific islands, have built such monumental works? No such astonishing numbers of massive statues are found anywhere else in the Pacific. How could the islanders possibly have moved so many multi-ton monoliths from the quarry inland, where they were carved, to their posts along the coastline? And most intriguing and vexing of all, if the island once boasted a culture developed and sophisticated enough to have produced such marvelous edifices, what happened to that culture? Why was the island the Europeans encountered a sparsely populated wasteland? The prevailing accounts of the island's history tell a story of self-inflicted

devastation: a glaring case of eco-suicide. The island was dominated by a powerful chiefdom that promulgated a cult of statue making, exercising a ruthless hold on the island's people and rapaciously destroying the environment, cutting down a lush palm forest that once blanketed the island in order to construct contraptions for moving more and more statues, which grew larger and larger. As the population swelled in order to sustain the statue cult, growing well beyond the island's agricultural capacity, a vicious cycle of warfare broke out between opposing groups, and the culture ultimately suffered a dramatic collapse. When Terry Hunt and Carl Lipo began carrying out archaeological studies on the island in 2001, they fully expected to find evidence supporting these accounts. Instead, revelation after revelation uncovered a very different truth. In this lively and fascinating account of Hunt and Lipo's definitive solution to the mystery of what really happened on the island, they introduce the striking series of archaeological discoveries they made, and the path-breaking findings of others, which led them to compelling new answers to the most perplexing questions about the history of the island. Far from irresponsible environmental destroyers, they show, the Easter Islanders were remarkably inventive environmental stewards, devising ingenious methods to enhance the island's agricultural capacity. They did not devastate the palm forest, and the culture did not descend into brutal violence. Perhaps most surprising of all, the making and moving of their enormous statutes did not require a bloated population or tax their precious resources; their statue building was actually integral to their ability to achieve a delicate balance of sustainability. The Easter Islanders, it turns out, offer us an impressive record of masterful environmental management rich with lessons for confronting the daunting environmental challenges of our own time. Shattering the conventional wisdom, Hunt and Lipo's ironclad case for a radically different understanding of the story of this most mysterious place is scientific discovery at its very best.

**In the Bubble** John Thackara, 2006-02-17 How to design a world in which we rely less on stuff, and more on people. We're filling up the world with technology and devices, but we've lost sight of an important question: What is this stuff for? What value does it add to our lives? So asks author John Thackara in his new book, *In the Bubble: Designing for a Complex World*. These are tough questions for the pushers of technology to answer. Our economic system is centered on technology, so it would be no small matter if tech ceased to be an end-in-itself in our daily lives. Technology is not going to go away, but the time to discuss the end it will serve is before we deploy it, not after. We need to ask what purpose will be served by the broadband communications, smart materials, wearable computing, and connected appliances that we're unleashing upon the world. We need to ask what impact all this

stuff will have on our daily lives. Who will look after it, and how? In the Bubble is about a world based less on stuff and more on people. Thackara describes a transformation that is taking place now—not in a remote science fiction future; it's not about, as he puts it, the schlock of the new but about radical innovation already emerging in daily life. We are regaining respect for what people can do that technology can't. In the Bubble describes services designed to help people carry out daily activities in new ways. Many of these services involve technology—ranging from body implants to wide-bodied jets. But objects and systems play a supporting role in a people-centered world. The design focus is on services, not things. And new principles—above all, lightness—inform the way these services are designed and used. At the heart of In the Bubble is a belief, informed by a wealth of real-world examples, that ethics and responsibility can inform design decisions without impeding social and technical innovation.

**Collapse** Jared Diamond, 2013-03-21 From the author of *Guns, Germs and Steel*, Jared Diamond's *Collapse: How Societies Choose to Fail or Survive* is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond's *Collapse* uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's *Collapse* also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. 'A grand sweep from a master storyteller of the human race' - Daily Mail 'Riveting, superb, terrifying' - Observer 'Gripping ... the book fulfils its huge ambition, and Diamond is the only man who could have written it' - Economist 'This book shines like all Diamond's work' - Sunday Times
