C.S. Ironclad Virginia Sumner Bradford Besse, 1937

The CSS Virginia John V Quarstein, 2021-03-08 This history of the Confederate Navy's ironclad warship "will likely be the definitive single title on the CSS Virginia" (Civil War News). When the CSS Virginia—formerly the USS Merrimack—slowly steamed down the Elizabeth River toward Hampton Roads on March 8, 1862, the tide of naval warfare turned from wooden sailing ships to armored, steam-powered vessels. Little did the ironclad's crew realize that their makeshift warship would achieve the greatest Confederate naval victory. The trip was thought by most of the crew to be a trial cruise. Instead, the Virginia's aggressive commander, Franklin Buchanan, transformed the voyage into a test by fire that forever proved the supreme power of iron over wood. The Virginia's ability to beat the odds to become the first ironclad to enter Hampton Roads stands as a testament to her designers, builders, officers, and crew. Virtually everything about the Virginia's design was an improvisation or an adaptation, characteristic of the Confederacy's efforts to wage a modern war with limited industrial

resources. Noted historian John V. Quarstein recounts the compelling story of this ironclad underdog, providing detailed appendices, including crew member biographies and a complete chronology of the ship and crew. Includes illustrations

Battlecruiser Repulse John Roberts, 2019-06-30 An outstanding illustrated reference revealing the painstaking work of draftsmen in recording every detail of the famed British warship. The technical details of British warships were recorded in a set of plans produced by the builders on completion of every ship. Known as the “as fitted” general arrangements, these drawings represented the exact appearance and fitting of the ship as it entered service. Intended to provide a permanent reference for the Admiralty and the dockyards, these highly detailed plans were drawn with exquisite skill in multi-colored inks and washes that represent the acme of the draftsman’s art. Today they form part of the incomparable collection of the National Maritime Museum at Greenwich, which is using the latest scanning technology to make digital copies of the highest quality. This book is one of a series based entirely on these drafts which depict famous warships in an unprecedented degree of detail—complete

sets in full color, with many close-ups and enlargements that make every aspect clear and comprehensible. Extensive captions point the reader to important features to be found in the plans, and an introduction covers the background to the design. The subject of this volume was one of the last battlecruisers, elegant ships that combined a powerful armament with high speed, but were much criticized for their light protection. Throughout their existence, they were controversial—three were sunk at Jutland—and Repulse herself was famously lost to Japanese air attack at the outset of the Pacific War. Nevertheless, the type was highly prized: Repulse and her sister Renown were the only capital ships given sufficient priority to be designed, built, and completed during the course of the First World War, and substantial sums were spent on large-scale reconstruction during the 1930s. Both of these phases of the ship's life are fully documented in two separate sets of plans, which allow this novel form of anatomy to cover the whole life of the ship.

Ships of the Civil War 1861-1865 Kevin Dougherty, 2013 The Civil war may be mainly remembered for its infamous land battles, such as Gettysburg, Manassas, and Shiloh, but its naval engagements

announced a new kind of naval warfare, with the first-time use of ironclads, submarines, and torpedoes, and the introduction of newer and more powerful naval artillery. The conflict saw the use of paddle-driven river boats, steam warships, ram ships, sloops, cruisers, and the development of new ironclad ships such as low-lying monitors. Arranged by type of ship, *Ships of the Civil War* provides concise coverage of some of the most famous warships of the era, including: the seminal duel between the ironclads CSS Virginia and the USS Monitor, the Confederate raider Alabama's demise off the USS Kearsage; and one of the first successful actions by a submarine, when CSS Hunley exploded a mine beneath the Federal gunboat USS Housatonic. The book also includes blockade runners, such as A.D. Vance and Hope; raiders, such as CSS Sumter and USS Quaker City; and cruisers, like the CSS Tallahassee, which spectacularly raided northern waters, destroying dozens of Federal merchantmen in the process. Filled with colorful artworks, expertly written background, and useful specifications of more than 120 fighting ships of the era, *Ships of the Civil War* is a handy guide to an often ignored aspect of the great struggle between North and South.

U.S.S. Monitor Edward M. Miller,1978-01-01 The author here provides a comprehensive and well-rounded account of the U.S.S. Monitor from the early days of her designer, John Ericsson in England, up to the 1975 move by the U. S. Government to establish the Monitor Marine Sanctuary in commemoration of the famous vessel. Through the use of old logs, newspapers, survivors' accounts and his own participation in the search for the Monitor, the author has presented a moving, eye-witness account spanning more than a century of American Naval history.

Hilton Village John V. Quarstein,2018 Newport News, Virginia. Established in 1918, Hilton Village was the first public housing project built in the United States. Spurred on by Newport News Shipbuilding president Homer Ferguson, it was created to house shipyard workers during World War I. The village was the city's first planned community and its first National Register of Historic Places district. Hilton's distinctive cottage-style architecture, reminiscent of an English village, is one of the first examples of the New Urbanism and Garden City movements in America. Along the tree-lined streets

are homes and shops that might have been pulled from a Dickens novel. The vision of the leaders who crafted Hilton Village--the shipyard's Ferguson, Harvard University town planner Henry Hubbard, and world-renowned architect Francis Joannes--remains apparent. -- Page [4] of cover.

Gridded Naval Wargames Bob Cordery,2018-05-19 This book follows on from 'The Portable Wargame' and 'Developing The Portable Wargame' to cover naval wargames that can be fought on a gridded tabletop. The book contains six sets of rules (three of which are from the 'Portable Naval Wargame' stable), four explanatory battle reports, and a chapter that explains 'How to ...' build simple model American Civil War ironclads. Aimed mainly at the wargamer who wants to include aspects of naval warfare in their wargames, it is suitable for both novice and experienced wargamers.

Building a Working Model Warship William Mowll,1997 This beautifully illustrated reference guide presents a working model of Warrior, built on the traditional shipbuilder's scale of 1:48.

Civil War Ironclads William H. Roberts,2007-08-30 Honorable Mention, Science and Technology category, John Lyman Book Awards, North American Society for Oceanic History Civil War Ironclads

supplies the first comprehensive study of one of the most ambitious programs in the history of naval shipbuilding. In constructing its new fleet of ironclads, William H. Roberts explains, the U.S. Navy faced the enormous engineering challenges of a largely experimental technology. In addition, it had to manage a ship acquisition program of unprecedented size and complexity. To meet these challenges, the Navy established a project office that was virtually independent of the existing administrative system. The office spearheaded efforts to broaden the naval industrial base and develop a marine fleet of ironclads by granting shipbuilding contracts to inland firms. Under the intense pressure of a wartime economy, it learned to support its high-technology vessels while incorporating the lessons of combat. But neither the broadened industrial base nor the advanced management system survived the return of peace. Cost overruns, delays, and technical blunders discredited the embryonic project office, while capital starvation and never-ending design changes crippled or ruined almost every major builder of ironclads. When Navy contracts evaporated, so did the shipyards. Contrary to widespread belief, Roberts concludes, the ironclad program set Navy shipbuilding back a generation.

The Battle of the Ironclads John V. Quarstein, 1999 Battle of the Ironclads brings to life the dramatic events which occurred in Hampton Roads on March 8 and 9, 1862. This first battle between armored vessels, often called the Monitor-Merrimack engagement, is perhaps the most significant naval event of the entire Civil War. This thrilling history is the first volume to offer a comprehensive pictorial interpretation of the men and ships that forever changed naval warfare. Over 150 images, including photographs, engravings, paintings, and sketches, have been gathered from museums, archives, and private collections to chronicle the exciting story of the U.S.S. Monitor and the C.S.S. Virginia (Merrimack). While Battle of the Ironclads is a visual history of the first battle between armored ships, it is also a saga of uncommon valor and leadership epitomized by Franklin Buchanan, George U. Morris, Samuel Dana Greene, and John Taylor Wood. The brilliant innovations of John Mercer Brooke and the farsighted inventions of John Ericsson made this showdown in Hampton Roads a death for wooden sailing ships. Battle of the Ironclads is indeed an epic tale that tells how steam-powered iron vessels not only influenced the Civil War, but more importantly, how the two ironclads

echoed the dawn of modern navies.

USS Monitor John D. Broadwater, 2012 Lavish illustrations (photographs, site drawings, and artifact sketches) complement this informative and highly readable account. Naval warfare buffs, amateurs and professionals involved in maritime archaeology, and Civil War aficionados will be intrigued and informed by *USS Monitor A Historic Ship Completes Its Final Voyage*.

Pearl Harbor Homer N. Wallin, 2001-09 Pearl Harbor will long stand out in mens minds as an example of the results of basic unpreparedness of a peace loving nation, of highly efficient treacherous surprise attack and of the resulting unification of America into a single tidal wave of purpose to victory. Therefore, all will be interested in this unique narrative by Admiral Wallin. The Navy has long needed a succinct account of the salvage operations at Pearl Harbor that miraculously resurrected what appeared to be a forever shattered fleet. Admiral Wallin agreed to undertake the job. He was exactly

the right man for it _ in talent, in perception, and in experience. He had served intimately with Admiral Nimitz and with Admiral Halsey in the South Pacific, has commanded three different Navy Yards, and was a highly successful Chief of the Bureau of Ships. On 7 December 1941 the then Captain Wallin was serving at Pearl Harbor. He witnessed the events of that shattering and unifying Day of Infamy. His mind began to race at high speeds at once on the problems and means of getting the broken fleet back into service for its giant task. Unless the United States regained control of the sea, even greater disaster loomed. Without victory at sea, tyranny soon would surely rule all Asia and Europe. In a matter of time it would surely rule the Americas. Captain Wallin salvaged most of the broken Pearl Harbor fleet that went on to figure prominently in the United States Navys victory. So the account he masterfully tells covers what he masterfully accomplished. The United States owes him an unpayable debt for this high service among many others in his long career.

Paper Captain Juliette Cezzar,2008 Ahoy there! Paper Captain takes the reader through a century of nautical history with facts, figures, and stunning illustrations, then lets every fantasy sailor cut out

and build twenty beautiful die-cut paper models—designed to float! Devised by the author and designer of Paper Pilot, Paper Captain is a beautifully illustrated voyage into the world of model boats, from speed boats and tugs to luxury liners and naval catamarans, bringing together stunning archival photographs and colorful technical drawings with expertly designed die-cut models that readers can cut out and assemble. The book presents innovative histories of twenty feats of maritime engineering drawn from maritime museums around the world, from the legendary British HMS Victory to the USS Monitor at the Mariner’s Museum in Virginia and the German U-505 at Chicago’s Museum of Science and Industry. Each boat is accompanied by its naval history, facts and statistics, and photographs of the vessels in action. Included are twenty finely detailed die-cut paper models, each presented with clear instructions for assembly and helpful advice for deploying your paper fleet—whether in the ocean or the bathtub.
