[Technology Commercialization](#) Sten A. Thore 2002-04-30 This title examines both general research and development commercialization and targeted new product innovation. New product development is a major occupation of the technical sector of the global economy and is viewed in many ways as a means of economic stability for a business, an industry, and a country. The heart of the book is a detailing of the analytical methods - with special, but not exclusive emphasis on DEA methods - for evaluating and ranking the most promising R & D and technical innovation being developed. The sponsors of the research and development may involve universities, countries, industries, and corporations - all of these sources are covered in the book. In addition, the trade-off of environmental problems vis-a-vis new product development is discussed in a section of the book. [Accounting Best Practices](#) Steven M. Accounts Receivable Management Best Practices John G. Salek 2005-10-24 Praise for Accounts Receivable Management Best Practices "An excellent reference tool on how to manage the accounts receivable process for any company. The use of real-life examples makes the concepts easy to understand. I recommend the book to anyone who wants to improve cash flow and reduce bad debt loss." —Michael E. Beaulieu, Senior Vice President, Finance Cardinal Health "Rather than simply explaining how to get the greatest return from an investment in accounts receivable, John G. Salek reveals how companies shoot themselves in the foot when management sets policies and procedures without consideration of the impact on cash flow. Accounts Receivable Management Best Practices isn't just for credit and collection professionals who often spend more time cleaning up process errors and other corporate 'garbage,' instead of managing risk. It should be required reading for C-level executives, the sales staff, operations managers, and anybody else whose job impacts the order-to-cash cycle." —David Schmidt, Principal, A2 Resources Coauthor of PowerCollecting: Automation for Effective Asset Management "Enhancing a company's competitive profile is all about giving enough customers the right product, at the right price, at the right time. This author's real-world approach to accomplishing this goal through the prism of receivables management makes this book a must-read for those companies looking to make their mark as an organization that cares about its customers as well as their own need to produce financial results." —Bruce C. Lynn, Managing Director The Financial Executives Consulting Group, LLC "I have worked with John Salek since 1992, both as his client and as a project manager working with his organization. Watts, Manager, Global Receivables (retired) General Electric Medical Systems "Mr. Salek has written a masterpiece on the intricacies and management of the accounts receivable portfolio. Corporate Credit Risk Management Christian Langkamp 2014-02-24 The financial crisis has shown that a significant proportion of the assets held by large corporations are exposed to credit risk that must be managed. This doctoral thesis sets out to analyse the contextual and organisational framework within which these activities are set and the practices employed by professionals in the field. This analysis draws on a set of interview-based data from large corporations in Europe and Brazil, predominantly from the chemical, energy, trading, and general manufacturing industries. Due to their diverse natures, the subjects of customer and financial institution counterparty credit risk are treated separately, addressing for each the organisation of the function, data acquisition process, and IT setup recommendable in order to effectively drive risk management, including a review for the practitioner to analyse his or her processes. A final chapter with analyses regarding trade credit insurance, sovereign risk, and quantitative special items rounds off the text making it into a comprehensive treatise on credit risk management in an industrial corporation.
